

Elemination Vs Substitution

- An alkylhalide having α H
- Primary halide will do SN_2 Rkn
- Secondary halides will do SN_2 & E_2 Rkn
- Tertiary halide will do SN_1 & E_1 Rkn

Depends on

1. Bulkness of base
- 2 .Steric hindrence
3. Strength of base
4. Stability of carbocation
5. Degree of substitution in alkene
