Curriculum and Credit Framework for Undergraduate Programmes

Introduction

The National Education Policy (NEP) 2020 (hereafter referred to as NEP or Policy) recognizes that higher education plays an extremely important role in promoting human as well as societal well-being and in developing India as envisioned in its Constitution - a democratic, just, socially conscious, cultured, and humane nation upholding liberty, equality, fraternity, and justice for all. It notes that "given the 21st-century requirements, quality higher education must aim to develop good, thoughtful, well-rounded, and creative individuals".

The NEP 2020 states, "Assessments of educational approaches in undergraduate education that integrate the humanities and arts with Science, Technology, Engineering and Mathematics (STEM) have consistently shown positive learning outcomes, including increased creativity and innovation, critical thinking and higher-order thinking capacities, problem-solving abilities, teamwork, communication skills, more in-depth learning and mastery of curricula across fields, increases in social and moral awareness, etc., besides general engagement and enjoyment of learning"

Further, it also recommends that "the undergraduate degree will be of either 3 or 4-year duration, with multiple exit options within this period, with appropriate certifications, e.g., a UG certificate after completing 1 year in a discipline or field including vocational and professional areas, or a UG diploma after 2 years of study, or a Bachelor's degree after a 3-year programme. The 4-year multidisciplinary Bachelor's programme, however, shall be the preferred option since it allows the opportunity to experience the full range of holistic and multidisciplinary education in addition to a focus on the chosen major and minors as per the choices of the student".

In accordance with the NEP 2020, the UGC has formulated a new student-centric "Curriculum and Credit Framework for Undergraduate Programmes (CCFUP)" incorporating a flexible choice-based credit system, multidisciplinary approach, and multiple entry and exit options. This will facilitate students to pursue their career path by choosing the subject/field of their interest. The NEP highlights certain fundamental principles that would guide both the education system at large, as well as individual educational institutions. The principles that have a direct bearing on the curricula for different levels of higher education include:

i. Recognizing, identifying, and fostering the unique capabilities of each student to promote her/his holistic development;

ii. Flexibility, so that learners can select their learning trajectories and programmes, and thereby choose their own paths in life according to their talents and interests;

iii. Flexibility, so that learners can select their learning trajectories and programmes, and thereby choose their own paths in life according to their talents and interests;

iv. Multidisciplinary and holistic education across the sciences, social sciences, arts, humanities, and sports for a multidisciplinary world;

v. Emphasis on conceptual understanding rather than rote learning, critical thinking to encourage logical decision-making and innovation; ethics and human & constitutional values, and life skills such as communication, teamwork, leadership, and resilience;

vi. Extensive use of technology in teaching and learning, removing language barriers, increasing access for *Divyang* students, and educational planning and management;

vii. Respect for diversity and respect for the local context in all curricula, pedagogy, and policy;

viii. Equity and inclusion as the cornerstone of all educational decisions to ensure that all students are able to thrive in the education system and the institutional environment are responsive to differences to ensure that high-quality education is available for all.

ix. Rootedness and pride in India, and its rich, diverse, ancient, and modern culture, languages, knowledge systems, and traditions.

The NEP envisages several transformative initiatives in higher education. These include:

• Introducing holistic and multidisciplinary undergraduate education that would help develop all capacities of human beings - intellectual, aesthetic, social, physical, emotional, ethical, and moral - in an integrated manner; soft skills, such as complex problem solving, critical thinking, creative thinking, communication skills; and rigorous specialization in a chosen field (s) of learning.

• Adoption of flexible curricular structures in order to enable creative combinations of disciplinary areas for study in multidisciplinary contexts that would also allow flexibility in course options that would be on offer to students, in addition to rigorous specialization in a subject or subjects.

• Undergraduate degree programmes of either 3 or 4-year duration, with multiple entry and exit points and re-entry options, with appropriate certifications such as:

• a UG certificate after completing 1 year (2 semesters) of study in the chosen fields of study,

• a UG diploma after 2 years (4 semesters) of study,

• a bachelor's degree after a 3-year (6 semesters) programme of study,

• a 4-year bachelor's degree (honours) after eight semesters programme of study. If the student completes a rigorous research project in their major area(s) of study in the 4th year of a bachelor's degree (honours with research).

• The 4-year bachelor's degree programme is considered a preferred option since it would provide the opportunity to experience the full range of holistic and multidisciplinary education in addition to a focus on the chosen major and minors as per the choices of the student.

• Inclusion of credit-based courses and projects in the areas of community engagement and service, environmental education, and value-based education.

• Environment education to include areas such as climate change, pollution, waste management, sanitation, conservation of biological diversity, management of biological resources and biodiversity, forest and wildlife conservation, and sustainable development and living.

• Value-based education to include the development of humanistic, ethical, Constitutional, and universal human values of truth, righteous conduct, peace, love, nonviolence, scientific temper, citizenship values, and life skills.

• Lessons in service and participation in community service programmes to be an integral part of holistic education.

• Global Citizenship Education and education for sustainable development to form an integral part of the curriculum to empower learners to become aware of and understand global and sustainable development issues and to become active promoters of more peaceful, tolerant, inclusive, secure, and sustainable societies.

• Students to be provided with opportunities for internships with local industry, businesses, artists, crafts persons, etc., as well as research internships with faculty and researchers at their own or other HEIs/research institutions, so that students may actively engage with the practical side of their learning and, as a by-product, further improve their employability.

• Reorienting teaching programmes to ensure the development of capabilities across a range of disciplines including sciences, social sciences, arts, humanities, languages, as well as vocational subjects. This would involve offering programmes/courses of study relating to Languages, Literature, Music, Philosophy, Art, Dance, Theatre, Statistics, Pure and Applied Sciences, Sports, etc., and other such subjects needed for a multidisciplinary and stimulating learning environment.

Preparing professionals in cutting-edge areas that are fast gaining prominence, such as Artificial Intelligence (AI), 3-D machining, big data analysis, and machine learning, in addition to genomic studies, biotechnology, nanotechnology, neuroscience, with important applications to health, environment, and sustainable living that will be woven into undergraduate education for enhancing the employability of the youth.

Curriculum Framework

Main features of the New Curriculum Framework

The new curriculum framework will have the following features:

- I. Flexibility to move from one discipline of study to another;
- II. Opportunity for learners to choose the courses of their interest in all disciplines;
- III. Facilitating multiple entry and exit options with UG certificate/ UG diploma/ or degree depending upon the number of credits secured;
- IV. Flexibility for learners to move from one institution to another to enable them to have multi and/or interdisciplinary learning;

Dr. Shyama Prasad Mukherjee University

V. Flexibility to switch to alternative modes of learning (offline, ODL, and Online learning, and hybrid modes of learning).

Definitions, Eligibility, and Duration of the Programme Semester/Credits:

• A semester comprises 90 working days and an academic year is divided into two semesters.

А term is for eight weeks during summer vacation. summer Internship/apprenticeship/work-based vocational education and training can be carried out during the summer term, especially by students who wish to exit after two semesters or four semesters of study. Regular courses may also be offered during the summer on a fast-track mode to enable students to do additional courses or complete backlogs in coursework. The HEIs can decide on the courses to be offered in the summer term depending on the availability of faculty and the number of students.

Major and Minor disciplines:

- Major discipline is the discipline or subject of main focus and the degree will be awarded in that discipline. Students should secure the prescribed number of credits (about 50% of total credits) through core courses in the major discipline.
- Minor discipline helps a student to gain a broader understanding beyond the major discipline. For example, if a student pursuing an Economics major obtains a minimum of 12 credits from a bunch of courses in Statistics, then the student will be awarded B.A. degree in Economics with a Minor in Statistics.

Awarding UG Certificate, UG Diploma, and Degrees:

- ➤ UG Certificate: Students who opt to exit after completion of the first year and have secured 40 credits will be awarded a UG certificate if, in addition, they complete one vocational course of 4 credits during the summer vacation of the first year. These students are allowed to re-enter the degree programme within three years and complete the degree programme within the stipulated maximum period of seven years.
- UG Diploma: Students who opt to exit after completion of the second year and have secured 80 credits will be awarded the UG diploma if, in addition, they complete one vocational course of 4 credits during the summer vacation of the second year. These students are allowed to re-enter within a period of three years and complete the degree programme within the maximum period of seven years.
- 3-year UG Degree: Students who wish to undergo a 3-year UG programme will be awarded UG Degree in the Major discipline after successful completion of three years, securing 120 credits and satisfying the minimum credit requirement as given in table 2 (Section 5).
- 4-year UG Degree (Honours): A four-year UG Honours degree in the major discipline will be awarded to those who complete a four-year degree programme with 160 credits and have satisfied the credit requirements as given in table 2 in Section 5.
- ➤ 4-year UG Degree (Honours with Research): Students who secure 75% marks and above in the first six semesters and wish to undertake research at the undergraduate level can choose a research stream in the fourth year. They should do a research project or dissertation under the guidance of a faculty member of the

University/College. The research project/dissertation will be in the major discipline. The students who secure 160 credits, including 12 credits from a research project/dissertation, are awarded UG Degree (Honours with Research).

- Internship: A course requiring students to participate in a professional activity or work experience, or cooperative education activity with an entity external to the education institution, normally under the supervision of an expert of the given external entity. A key aspect of the internship is induction into actual work situations. Internships involve working with local industry, government or private organizations, business organizations and similar entities to provide opportunities for students to actively engage in on-site experiential learning.
- Students are advised to pursue the Internship Course in the following period:
 - I.Break between II & III Semester of one paper containing 4 Credits (Compulsory for all students) or
 - II. Break between IV & V Semester of one paper containing 4 Credits (Compulsory for all students) or
 - III. During V Semester of one paper containing 4 Credits (Compulsory for all students).

SEE: ANNEXURE-NEP 2020

Dr. Shyama Prasad Mukherjee University

SEMESTER- I

COURSE CODE	:-	MJ-101T
COURSE TITLE	:-	Computer Organization and IT Tools
CREDIT	:-	3

Time: 3 hours

Full Marks for End Semester: 60

Internal Assessment: 15 Marks (Mid Sem -10 & Assignment Work-5 Marks) No. of

Lectures: 45

Instruction to Question Setter for End Semester Examination (ESE 60 marks):

Group-A: Objective questions (Compulsory)	:	2 x 10 = 20
Group-B: short type questions (3 out of 5 questions)	:	$3 \times 5 = 15$
Group-C: Descriptive Type Questions (2 out of 4 questions)	:	12.5x2 = 25
Total =		60

Module 1: Introduction to Computers -Hardware, software- System software, Application software, Utility software, Operating System; Computer Languages - Machine Level, Assembly Level & High-Level Languages, Translator Programs – Assembler, Interpreter and Compiler; Introduction to Free and Open-Source Software, Definition of Computer Virus, Types of Viruses, Use of Antivirus software; Planning a Computer Program –Algorithm and Flowchart with Examples.

Module 2: Number System, Signed/Unsigned nos., 2's complement no's, Boolean algebra.

Module 3: Simplification of Boolean Expressions, Karnaugh Map. Logic Gates, Truth Tables

Module 4: Combinational Circuits- Half & Full Adders, Multiplexers, Demultiplexers, Encoders, Decoders.

Module 5: Sequential Circuits- JK, RS, T, D Flip Flop.

Module 6: Shift register, Synchronous and Asynchronous counters.

Module 7: Microprocessor-simple Architecture of 8085 & 8086, DMA.

Course Outcomes: -

After the completion of this course, students will be to:

1. Explain the merits and pitfalls in computer performance measurements and analyse the impact of instruction set architecture on cost-performance of computer design

Dr. Shyama Prasad Mukherjee University

- 2. Explain Digital Logic Circuits, Data Representation
- 3. Register and Processor level Design and Instruction Set architecture
- 4. Solve problems related to computer arithmetic and determine which hardware blocks and control lines are used for specific instructions
- 5. Explain memory organization,
- 6. I/O organization and its impact on computer cost /performance.

Books Recommended:

- 1. Computer system Architecture M. M. Mano
- 2. Digital electronics B. Ram.
- 3. Digital logic and Computer Design Morris Mano

Dr. Shyama Prasad Mukherjee University

SEMESTER- I

COURSE CODE	:-	MJ-101P
COURSE TITLE	:-	Lab Based on Office Tools
CREDIT	:-	1

Lab of power point as assignment

- 1. Open a Blank presentation
- 2. Save the presentation as firstLab.pptx
- 3. Add a Title to the first slide: the name of your college
- 4. Type your first name and last name in the Subtitle section
- 5. Add a New Slide which has a Title and Content
- 6. Add a title to the second slide "My college "
- 7. In the Content section of the second slide, add information about college
- 8. Right click on the second slide from the left panel, then choose Duplicate Slide
- 9. Highlight the text in the Content area of the third slide. Under the Home tab, click Convert to SmartArt, then choose Basic Cycle
- 10. From the left panel, drag the third slide between the first and second slide
- 11. Change the layout of the third slide, the slide that does not have the Smart Art, to Comparison
- 12. Leave the title "My college"
- 13. In the head of the first column, type "my first day in college," then center the heading
- 14. In the head of the second column, type "my college friends," then center the heading
- 15. Add at least three points in each section
- 16. Then add a New Slide
- 17. Change the layout of the new slide to Blank
- 18. Insert a Graduation Online Picture from the Office ClipArt—Choose any image of your choice
- 19. Change the ClipArt size to 3" X 3" and position it in the middle of the slide
- 20. Apply the Wisp Design Theme
- 21. Save firstLab.pptx
- 22. open firstLab.pptx
- 23. Save the presentation as secondLab.pptx
- 24. Apply the Ripple Transition to all slides
- 25. In the second slide, **Demote** all bullets below **Great Presentation**
- 26. Apply Grow & Turn animation to all slides
- 27. Reorder the second slide Animation
- 28. Add Notes to the second slide entitled "My semester 1 journey"
- 29. Add the Header and Footer
- 30. Change the Design Variants to Wisp Light Blue

Lab of Ms-word as assignment

Type the following text in Document.

Organizations Structure

Organizations can be regarded as people management systems. They range from simple hierarchies along traditional lines to complex networks dependent on computer systems and telecommunication. Human resource managers can encourage organization to adopt strategies (for

Department of Information Technology

Dr. Shyama Prasad Mukherjee University

their structures) which foster both cost-effectiveness and employee commitment. Organizations structures can be classified into a number of types, including functional, divisional, matrix, federations and networks.

Functional Structures

Early organizational design divided enterprises into relatively simple parts, splitting them into defined activities such as production, marketing or personal. Functional organizations have the advantage of being simple to understand with clear lines of command, specified tasks and responsibilities. Staff can specialize in a particular business area such as production or marketing and follow well-defined career path. This is equally true of human resource specialists who can develop expertise in specific areas such as employee relations or reword management.

Perform the Following Operations Based on the Above Passage.

- 1. 'Save' the file as a 'Document file' in C:\Desktop\yourname. (Create the directories wherever necessary)
- 2. 'Save' the file as a 'web page' in C:\Director\SalesMgr\AreaMgr2.
- 3. Change the 'page Layout' to 'Landscape'.
- 4. Change the Right Margin of the document to 2.0.
- 5. Change the Left Margin of the document to 1.5.
- 6. Apply different heading styles to the text 'welcome to MS-Word'.
- 7. Underline the heading.
- 8. Align the heading to the 'centre' of the page.
- 9. Change style "Organization" to "italics" wherever it occurs.
- 10. 'Justify' the passage.
- 11. Type your name at the end of the passage and 'Right justify' it.

Open the Above Created Document and perform the Following Operations.

- 1. Change the font of the heading to 'Arial'.
- 2. Insert Date at the top of the document and 'Left justify' it.
- 3. Change the 'line spacing' to '1.5 lines'.
- 4. Apply 'Drop Cap' to the passage for the first 3 lines.
- 5. Change the view to 'Normal Layout', 'Webpage Layout', 'print Layout', 'Reading Layout' And 'outline Layout'.
- 6. Move the cursor to line number '7'.
- 7. Hide the 'Ruler' from the document.
- 8. Insert a new 'Page' after the passage.
- 9. Add the definition of organization as a 'Comment' to the word "Organization" appearing in the first line of the passage.
- 10. 'Preview' the document.
- 11. Change 'Background' of the document to 'Red' color.

Lab of Excel as assignment

- 1. Open a new 'Worksheet' and save it with file name "Anjali".
- 2. Open 'Worksheet', type *Challenge*, in cell E3.
- 3. Change the font of the content of cell E3 to Arial and size to 16.
- 4. Format the content of cells E3 to Bold and Italic.
- 5. Type some data in cells D5 and C5 and
 - i. Copy contents of cell D5 into cell C1.
 - ii. Cut the contents of cell C5 and paste it in cell F3.
 - iii. Fill the content of cell D5 into next 4 cells using mouse.
- 6. Using the fill option in the edit menu do the following.

Department of Information Technology

Dr. Shyama Prasad Mukherjee University

- i. Fill in a series of numbers from 1 to 20 (row wise & column wise).
- ii. Fill in a series of dates.
- iii. Fill in a series of weekdays.
- iv. Fill in a series of alphanumeric numbers.
- v. Fill in a series of months.
- 7. Create and delete a custom fill series of alphabets.
- 8. Enter a few random numbers and then 'Format' the number with thousand's separator and a decimal of two digits.
- 9. Enter some data into different cells locked at different places of the worksheet.
- 10. Insert a 'Header and footer' to a worksheet.
- 11. Replace the 'Sheet Name' called sheet with the name of your college.
- 12. View the data in 'page Break' format.
- 13. Type some text in cell D5 and give a 'Comment'.

Dr. Shyama Prasad Mukherjee University

SEMESTER-II

COURSE CODE	: -	MJ-201T
COURSE TITLE	: -	PROGRAMMING IN C
CREDIT	: -	3

Time: 3 hours

Full Marks for End Semester: 60

Internal Assessment: 15 Marks (Mid Sem -10 & Assignment Work-5 Marks) No. of

Lectures: 45

Instruction to Question Setter for End Semester Examination (ESE 60 marks):

Group-A: Objective questions (Compulsory)	:	2 x 10 = 20
Group-B: short type questions (3 out of 5 questions)	:	$3 \times 5 = 15$
Group-C: Descriptive Type Questions (2 out of 4 questions)	:	12.5x2 = 25
Total =		60

Module 1: Origin and Introduction Programming languages About C, Evolution of C, Structure of a C Program, Compilers & Interpreters Compiling a C Program, A Simple C Program.

Module 2: Data Types, Variables and Constants Data Types Variables, Constants Operators, Type Modifiers and Expressions Operators, Type Modifiers Expressions, Introduction to Input/output Console I/O Functions, Unformatted Console I/O Functions.

Module 3: Control Constructs Control Statements, Conditional Statements, Loops in C, The break Statement, The Continue Statement.

Module 4: Arrays and String Introduction to Arrays, One Dimensional & Two-Dimensional Arrays. Introduction to strings

Module 5: Functions Introduction to Functions, Function Declaration and Prototypes, Recursion in Function.

Module 6: Pointers Introduction to Pointers, Pointer Notation. Pointer Declaration and Initialization, Accessing Variable through Pointer, Pointer Expressions, Pointers and One-Dimensional Arrays.

Module 7: Structures Structure Definition, Structure Initialization, Arrays of Structures, Arrays within Structures. Structures within Structures, Passing Structures to Functions **Module 8:** File Handling in C What is a File, Defining and Opening a File, Functions for Random Access to Files.

Course Outcomes: -After the completion of this course, students will be to:

1. The course is designed to provide complete knowledge of C language.

2. Students will be able to develop logics which will help them to create programs,

applications in C.

Dr. Shyama Prasad Mukherjee University

3. Learning the basic programming constructs they can easily switch over to any other

language in future.

Reference Books:

- 1. Programming in C By Stephen G. Kochan
- 2. Programming in C By E balagurusamy

Reference Books:

- 1. Programming in C By Stephen G. Kochan
- 2. Programming in C ByM.T.Somashekara

Dr. Shyama Prasad Mukherjee University

SEMESTER- II

COURSE CODE	:-	MJ-201P
COURSE TITLE	:-	PROGRAMMING IN C
CREDIT	:-	1

List of Programs as Assignments:

- 1. Write a Hello World Program in C.
- 2. Write a C program to check whether the given number is positive or negative.
- 3. Write a C Program to find greatest of three numbers.
- 4. Write a C Program to print Fibonacci series in a given range.
- 5. Write a C Program to find factorial of a given number.
- 6. Write a C program to find Prime numbers in a given range.
- 7. Write a C Program to check if given number is Armstrong or not.
- 8. Write a C Program to check if given number is palindrome or not.
- 9. Write a C program to display palindrome numbers in a given range
- 10. Write a C Program to check if number is odd or even
- 11. Write a C Program to find out the ASCII value of a character
- 12. Write a C Program to find the size of int, float, double and char
- 13. Write a C Program to check whether an alphabet is vowel or consonant.
- 14. Write a C Program to check leap year.
- 15. Write a C Program to find sum of first n natural numbers.
- 16. Write a Program to convert string from upper case to lower case.
- 17. Write a Program to convert string from lower case to upper case.
- 18. Write a C program to Sort a set of strings in ascending alphabetical order.
- 19. Write a C program Find length of a string without using strlen().
- 20. Write a C program to String concatenation without using strcat.
- 21. Write a Program to sort array in ascending order.
- 22. Write a C program to find largest element of given array.
- 23. Write a C program to find sum of array elements.
- 24. Write a C Program to find number of elements in an array.
- 25. Find the value of nPr for given value of n & r.
- 26. C Program to multiply two floating numbers.
- 27. C Program to find out Quotient and Remainder.
- 28. C Program to find average of two numbers
- 29. Binary to decimal conversion
- 30. C Program to convert Decimal to Binary
- 31. Write a c program to find multiplication of two matrices.
- 32. Write a c program to add two matrices.
- 33. Write a program in C to find the sum of the series 1!/1+2!/2+3!/3+4!/4+5!/5
- 34. WAP to display the following pattern:

Dr. Shyama Prasad Mukherjee University

Write the following programs using function:

- 1. Write a C program to Reverse an input number using recursion.
- 2. Write a C program to Reverse a String using recursion.
- 3. Write a C programming to find out maximum and minimum of some values using function which will return an array.
- 4. Write a C Program to find greatest of three numbers.
- 5. Write a C Program to print Fibonacci series in a given range.
- 6. Write a C Program to find factorial of a given number.
- 7. Write a C program to find Prime numbers in a given range.
- 8. Write a C Program to check if given number is Armstrong or not.
- 9. Write a C Program to check if given number is palindrome or not.
- 10. Write a C program to display palindrome numbers in a given range

Pointer

- 1. Write a Program to sort array in ascending order.
- 2. Write a C program to find largest element of given array.
- 3. Write a C program to find sum of array elements.
- 4. Write a C Program to find number of elements in an array.
- 5. Write a C program of Binary to decimal conversion
- 6. Write a C Program to convert Decimal to Binary
- 7. Write a c program to find multiplication of two matrices.
- 8. Write a c program to add two matrices.
- 9. Write a program in C to find the sum of the series 1!/1+2!/2+3!/3+4!/4+5!/5

Structure

- 1. Write a program to Store information of a student using structure
- 2.Write a program to Add two complex numbers by passing structures to a function
- 3. Write a program to Store information of n students using structures

Dr. Shyama Prasad Mukherjee University

SEMESTER- II

COURSE CODE	:-	MJ-202T
COURSE TITLE	:-	OPERATING SYSTEM
CREDIT	:-	3

Time: 3 hours

Full Marks for End Semester: 60

Internal Assessment: 15 Marks (Mid Sem -10 & Assignment Work-5 Marks) No. of

Lectures: 45

Instruction to Question Setter for End Semester Examination (ESE 60 marks):

Group-A: Objective questions (Compulsory)	:	2 x 10 = 20
Group-B: short type questions (3 out of 5 questions)	:	$3 \times 5 = 15$
Group-C: Descriptive Type Questions (2 out of 4 questions)	:	12.5x2 = 25
Total =		60

Module 1: Concept of Operating System: Simple batch systems, multiprogrammed batch systems, time-sharing systems, parallel systems, distributed systems, real-time systems. **Module 2:** Computer System structure: Computer System Operation, I/O structures storage structure, storage hierarchy and hardware protection.

Module 3: Operating System structure: System components, system services, system calls, system programs, and system structure- simple structure. Process concept: process state, process control blocks, process scheduling and schedulers

Module 4: CPU scheduling: CPU-I/O burst cycle, scheduling criteria, scheduling algorithms (Non pre-emptive-FCFS, SJFS, Pre-emptive-SJFS, and RR).

Module 5: Memory management: contiguous allocation, Paging, Swapping, And Segmentation. Virtual memory- Demand paging, page replacement, page replacement algorithms (FIFO, LRU).

Module 6: File system structures- file allocation (contiguous, linked, and indexed

Module 7: Disk structure- Disk scheduling (FCFS, SSTF, SCAN)

Module 8: Security- The problem, authentication, and program- threats, encryption.

ourse Outcomes: -

After the completion of this course, students will be to:

- 1. Describe the main components of OS and their working .
- 2. Explain the concepts of process and thread and their scheduling policies
- 3. Solve synchronization and deadlock issues
- 4. Compare the different techniques for managing memory.
- 5. I/O, disk and files .
- 6. Design components of operating system

Books Recommended:

- 1. Operating System: Peter Gelvin
- 2. Operating System: God bole Dhamdhare

Department of Information Technology

SEMESTER- II

COURSE CODE	:-	MJ-202P
COURSE TITLE	: -	Lab Based on MS DOS
CREDIT	: -	1

LAB: MS.DOS/LINUX Basic of DOS commands-1.. DATE 2. TIME 3.VER 4.VOL 5.CLS **6.COPY CON** 7. TYPE CON 8. COPY 9. REN 10. MD 11. CD 12. RD 13.TREE, 14. External Commands-15. XCOPY 16. DEL **17. DELTREE** 18. CHDSK and 19 Batch Creation 20. Usage of following commands: ls, pwd, tty, cat, who, who am I, rm, mkdir, rmdir, touch, cd.

- 21. Usage of following commands: cal, cat(append), cat(concatenate), mv, cp, man, date.
- 22. Usage of following commands: chmod, grep, tput (clear, highlight), bc.
- 23. Write a shell script to check if the number entered at the command line is prime or not.
- 24. Write a shell script to modify "cal" command to display calendars of the specified months.
- 25. Write a shell script to modify "cal" command to display calendars of the specified range of months.

Dr. Shyama Prasad Mukherjee University

SEMESTER- III

COURSE CODE	:-	MJ-301T
COURSE TITLE	:-	DATA STRUCTURE WITH C
CREDIT	:-	3

Time: 3 hours

Full Marks for End Semester: 60

Internal Assessment: 15 Marks (Mid Sem -10 & Assignment Work-5 Marks) No. of

Lectures: 45

Instruction to Question Setter for End Semester Examination (ESE 60 marks):

Group-A: Objective questions (Compulsory)	:	2 x 10 = 20
Group-B: short type questions (3 out of 5 questions)	:	3 x 5 = 15
Group-C: Descriptive Type Questions (2 out of 4 questions)	:	12.5x2 = 25
Total =		60

Module1: Introduction to Data Structure Basic Concepts, Algorithms, Notations, Data Structure operations. Implementations of Data Structures, Mathematical Notations, Functions.

Module2: ARRAYS Insertion and deletion of element from an Array, Static Memory Allocation, searching

Module 3: STACK And Queue Implementation of Stack, Array-based Implementation. Applications of Stack. Evaluating Postfix Expression, Simulating Recursive Function using Stack.

Module 4: QUEUE Queue Implementation, Array-based Implementation.

Module 5: LINKED LISTS Dynamic Allocation of Memory, Representation of Linked List. Implementation of Single Linked List, Insertion, deletion and traversing through single linked list. Implementation of Doubly Linked Lists, Insertion, deletion and traversing through Double linked list

Module 6: TREES Introduction to Trees, Binary Tree, Implementation of Binary tree, Binary Tree Traversal. Searching a Binary Tree,

Module 7: Binary search tree, Insertion, deletion and traversing through BST, Introduction to Threaded Binary Trees, AVL Tree.

Module 8: Searching and Sorting Linear or Sequential Search, Binary Search. Bubble sort, Selection sort, Insertion sort, Quick sort, Simple Merge sort, heap sort.

Course Outcomes: -After the completion of this course, students will be to:

Dr. Shyama Prasad Mukherjee University

- 1. Define various linear and non-linear data structures like stack, queue, linked list, tree and graph.
- 2. Explain operations like insertion, deletion, traversal, searching, sorting etc. on various data structures ,
- 3. Design various data structures and their operations.
- 4. Analyze the performance of data structure based operations including searching and sorting.

Books Recommended:

- 1. Data Structures Lipschitz.
- 2. Data Structures through C-Y.P. Kanetkar.
- 3. Data Structure Samanta

Dr. Shyama Prasad Mukherjee University

SEMESTER- III

COURSE CODE	: -	MJ-301P
COURSE TITLE	: -	DATA STRUCTURE WITH C
CREDIT	: -	1

Lab of Data Structure with C as assignment

- 1. Program to Find the Number of Elements in an Array
- 2. Develop and implement a menu driven program in C for the following Array operations
 - a. Creating Array of N Integer elements.
 - b. Display of Array elements with suitable headings.
 - c. Inserting an element (ELEM) at a given valid position (POS).
 - d. Deleting an element at a given valid position (POS).
 - e. Exit
- 3. Programs for Stack, Queues using Arrays
- 4. Program to convert an Infix Expression into Postfix and Postfix Evaluation
- 5. Program to implement stack using arrays
- 6. Program to implement queue using arrays
- 7. Program to reverse elements in a queue
- 8. Program to create add remove & display element from single linked list
- 9. Program to create add remove & display element from double linked list
- 10. Program to count number of nodes in linear linked list
- 11. Program to concatenate two linear linked lists
- 12. Program to accept a singly linked list of integers & sort the list in ascending order.
- 13. Program to reverse linked list
- 14. Program for the creation of binary tree in c
- 15. Program for pre-order, post-order & in-order traversals of a binary tree using non recursive.
- 16. Program to count no, of leaves of binary tree
- 17. Program for implementation of Binary Search -tree (insertion & deletion)
- 18. Program to implement bubble sort program using arrays
- 19. Program to implement merge sort using arrays
- 20. Program to implement selection sort program using arrays
- 21. Program to implement insertion sort program using arrays
- 22. Program to implement bubble sort program using pointers
- 23. Program to implement linear search using arrays
- 24. Program to implement Tower of Hanoi problem.
- 25. Program to implement binary search using arrays

Dr. Shyama Prasad Mukherjee University

SEMESTER-III

COURSE CODE	: -	MJ-302T
COURSE TITLE	: -	GRAPH THEORY
CREDIT	: -	3

Time: 3 hours

Full Marks for End Semester: 60

Internal Assessment: 15 Marks (Mid Sem -10 & Assignment Work-5 Marks) No. of

Lectures: 45

Instruction to Question Setter for End Semester Examination (ESE 60 marks):

Group-A: Objective questions (Compulsory)	:	2 x 10 = 20
Group-B: short type questions (3 out of 5 questions)	:	3 x 5 = 15
Group-C: Descriptive Type Questions (2 out of 4 questions)	:	12.5x2 = 25
Total =		60

Module 1: Introduction: What are Graph, Application of Graphs, Finite and Infinite Graphs, Incidence and Degree, Isolated Vertex, Pendant Vertex and Null Graph?

Module 2: PATHS AND CIRCUITS: Isomorphism, Sub graphs, Walks, Paths and Circuits, Connected Graphs, Disconnected Graphs and Components,

Module 3: Euler Graphs, Operations on Graphs, Hamiltonian Paths and Circuits, The Travelling Salesman Problem.

Module 4: TREES AND FUNDAMENTAL CIRCUITS: Trees, Some Properties of Trees, Pendent Vertices in a Tree, Distance and Centers in a Tree, Spanning Trees, Fundamental Circuits, Finding all Spanning Trees of a Graph.

Module 5: CUT-SETS ANDCUT VERTICES: Cut Sets, Some Properties of a Cut-Set, All Cut Sets in a Graph, Fundamental Circuits and Cut-Sets,

Module 6: Connectivity and Separability, Network Flows, I-Isomorphism, 2-Isomorphism. (Statements and applications of Theorems only, no proofs).

Course Outcomes: -After the completion of this course, students will be to:

- 1. Analyze different types of graphs and their applications in real world.
- 2. Perceive the role of cut-set, cut-vertex and fundamental circuits in network

flows.

- Dr. Shyama Prasad Mukherjee University
 - 3. Create an awareness of planar and dual graph.
 - 4. Explain how to represent graphs in a computer system,

Books Recommended:

1. Graph Theory: Nursing Dev

Dr. Shyama Prasad Mukherjee University

SEMESTER- III

COURSE CODE	: -	MJ-302P
COURSE TITLE	: -	LAB BASED ON GRAPH THEORY
CREDIT	: -	1

Suggested Practical List

Using C Programming Language: -

- 1. Program to find the vertices, even vertices, odd vertices and number of edges in the graph.
- 2. Program to find the union, intersection and ring sum of two graphs
- 3. Program to find shortest path between 2 vertices in a graph
- 4. Program to find path between two vertices using Hamilton path.
- 5. Program to find shortest path between every pair of vertices in a graph.
- 6. Program for finding maximum matching for general path

Dr. Shyama Prasad Mukherjee University

SEMESTER- IV

COURSE CODE	: -	MJ-401T
COURSE TITLE	: -	PROGRAMMING IN C++
CREDIT	: -	3

Time: 3 hours

Full Marks for End Semester: 60

Internal Assessment: 15 Marks (Mid Sem -10 & Assignment Work-5 Marks) No. of

Lectures: 45

Instruction to Question Setter for End Semester Examination (ESE 60 marks):

Group-A: Objective questions (Compulsory)	:	2 x 10 = 20
Group-B: short type questions (3 out of 5 questions)	:	$3 \times 5 = 15$
Group-C: Descriptive Type Questions (2 out of 4 questions)	:	12.5x2 = 25
Total =		60

Module 1: OOPS: Concepts of OOPS and differences with procedural languages, characteristics of OOPS (Idea of objects, class, data abstraction & encapsulation, inheritance, polymorphism, dynamic binding, I/O stream, Cin, Cout, I/O manipulation).

Module2: Data Types, operators, Control structure & looping statements, Functions and arrays.

Module 3: Objects & classes: classes and objects, constructor, destructor

Module 4: Operators overloading: unary operator (++, --,-) binary operators using member function and friend function

Module 5: Inheritance: Derived class and base class, protected access specifier, derived class constructors, class hierarchies, abstract base class, public and private inheritance, Multiple inheritance, containership (classes within classes).

Module 6: Pointers: Address and pointers, pointers and arrays, memory management. "New" & "delete" pointer to objects, pointer to pointer and "this" pointer

Module 7: Functions: Virtual functions, Friend functions, static functions.

Module 8: Files and streams: String, string I/O, object I/O, I/O with multiple objects file pointer

Course Outcomes: -After the completion of this course, students will be to:

- 1. Understand the difference between the top-down and bottom-up approach
- 2. Describe the object-oriented programming approach in connection with C++

Dr. Shyama Prasad Mukherjee University

- 3. Apply the concepts of object-oriented programming
- 4. Illustrate the process of data file manipulations using C++

Books Recommended:

- I. C++ -Lafore
- 2. C++ -Balaguruswamy
- 3. C ++ -Kanetkar

Dr. Shyama Prasad Mukherjee University

SEMESTER- IV

COURSE CODE	: -	MJ-401P
COURSE TITLE	: -	Lab Based on C++
CREDIT	: -	1

List of C++ program as assignment

- 1. Write a C++ program to find the sum for the given variables using function with default arguments.
- 2. Write a C++ program to swap the values of two variables and demonstrates a function using call by value.
- 3. Write a C++ program to swap the values of two variables and demonstrates a function using Call by reference using reference type (&).
- 4. Write a C++ program to swap the values of two variables and demonstrates a function using Call by reference using pointer (*).
- 5. Write a C++ program to swap the values of two dynamically allocated variables and release the memory after swapping. (use new & delete operators)
- 6. Write a program to find the largest, smallest & second largest of three numbers. (use inline function MAX and MIN to find largest & smallest of 2 numbers)
- 7. Write a program to calculate the volume of different geometric shapes like cube, cylinder and sphere and hence implement the concept of Function Overloading.
- 8. Write a C++ program to create a template function for Bubble Sort and demonstrate sorting of integers and doubles.
- 9. Define a STUDENT class with USN, Name, and Marks in 3 tests of a subject. Declare an array of 10 STUDENT objects. Using appropriate functions, find the average of the two better marks for each student. Print the USN, Name and the average marks of all the students.
- 10. Write a C++ program to create a class called COMPLEX and implement the following overloading functions ADD that return a complex number:
 (i) ADD (a, s2) where 'a' is an integer (real part) and s2 is a complex number
 (ii) ADD (s1, s2) where s1 and s2 are complex numbers.

11. Friend functions and friend classes:

a) Write a program to define class name HUSBAND and WIFE that holds the income respectively. Calculate and display the total income of a family using Friend function.b) Write a program to accept the student detail such as name and 3 different marks by get_data() method and display the name and average of marks using display() method. Define a friend class for calculating the average of marks using the method mark_avg().

12. Write a C++ Program to display Names, Roll No., and grades of 3 students who have appeared in the examination. Declare the class of name, Roll No. and grade. Create an array of class objects. Read and display the contents of the array.

13. Write a C++ program to declare Struct. Initialize and display contents of member variables.

14. Write a C++ program to declare a class. Declare pointer to class. Initialize and display the contents of the class member.

15. Given that an EMPLOYEE class contains following members: data members: Employee number, Employee name, Basic, DA, IT, Net Salary and print data members.

16. Write a C++ program to read the data of N employee and compute Net salary of each employee (DA=52% of Basic and Income Tax (IT) =30% of the gross salary).

17. Write a C++ program to use scope resolution operator. Display the various values of the same variables declared at different scope levels.

18.Write a C++ program to allocate memory using new operator.

19. Write a C++ program to create multilevel inheritance. (Hint: Classes A1, A2, A3)

20. Write a C++ program to create an array of pointers. Invoke functions using array objects. 21.Write a C++ program to use pointer for both base and derived classes and call the member function. Use Virtual keyword.

Dr. Shyama Prasad Mukherjee University

SEMESTER- IV

COURSE CODE	:-	MJ-402T
COURSE TITLE	:-	COMPUTER NETWORK
CREDIT	:-	3

Time: 3 hours

Full Marks for End Semester: 60

Internal Assessment: 15 Marks (Mid Sem -10 & Assignment Work-5 Marks) No. of

Lectures: 45

Instruction to Question Setter for End Semester Examination (ESE 60 marks):

Group-A: Objective questions (Compulsory)	:	2 x 10 = 20
Group-B: short type questions (3 out of 5 questions)	:	$3 \times 5 = 15$
Group-C: Descriptive Type Questions (2 out of 4 questions)	:	12.5x2 = 25
Total =		60

Module1: Basic network concepts, advantages and disadvantages of computer networks, types of networks-LAN, WAN, MAN LAN Technology: LAN architecture, Bus/Tree LAN, Ring & Star LANs Network topologies, Hardware requirement of a network, Network operating system.

Module 2: A communication model, three-layer approach to protocols, brief introduction to TCP/IP and OSI (brief function to different layers),

Module 3: Data Transmission: concept and terminology, analog and digital data transmission. Transmission impairments, Guided transmission media. digital data digital signal, digital data analog signal, analog data digital signal and analog data analog signal

Module 4: Data link control: flow control, error detection Error control, High level data control (HDLC).

Module 5: Circuit switching: switched network, circuit switching networks, switching concepts, Packet Switching: packet switching principals, congestion and control

Module 6: Ethernet: -Standard Ethernet and Fast Ethernet, CSMA/CD, CSMA/CA, Token ring

Module 7: Network Security: Requirements, conventional encryption, public key encryption & digital signature. (No numerical related questions are to be asked

Course Outcomes: -After the completion of this course, students will be to:

- 1. Identify the elements of a communication network.
- 2. Illustrate different data communications and networking standards.

- 3. Design and implement a simple LAN and a WAN that meet a specific set of criteria.
- 4. Identify the new trends and technologies, their potential applications.
- 5. Examine the social impact of the networking technology particularly on issues related to security and privacy.

Books Recommended:

- 1. Data Communication and Networking: Tannenbaum
- 2. Data Communication and Networking: W. Stalling
- 3. Data Communication and Networking: Frozen

Dr. Shyama Prasad Mukherjee University

SEMESTER- IV

COURSE CODE	:-	MJ-402P
COURSE TITLE	:-	Lab Based on Computer Configuration
CREDIT	:-	1

Installation of operating system, introduction of hardware.

List of Assignment for Computer Network

- 1. Windows as operating system, history, versions.
- 2. PC hardware, BIOS, Devices and drivers,
- 3. Kernal Configuration and building
- 4. Application installation, configuration and maintenance
- 5. Server services and Client services
- 6. Difference between Windows/windows7 and windows server 2003/2008

Dr. Shyama Prasad Mukherjee University

SEMESTER- IV

COURSE CODE	:-	MJ-403T
COURSE TITLE	:-	DATA BASE MANAGEMENT SYSTEM
CREDIT	:-	3

Time: 3 hours

Full Marks for End Semester: 60

Internal Assessment: 15 Marks (Mid Sem -10 & Assignment Work-5 Marks) No. of

Lectures: 45

Instruction to Question Setter for End Semester Examination (ESE 60 marks):

Group-A: Objective questions (Compulsory)	:	2 x 10 = 20
Group-B: short type questions (3 out of 5 questions)	:	$3 \times 5 = 15$
Group-C: Descriptive Type Questions (2 out of 4 questions)	:	12.5x2 = 25
Total =		60

Module1: Introduction to DBMS- Purpose, difference with respect to conventional file processing system, data abstraction, data independence, data models (object-based, record based, physical data models), database administrator, overall system structure.

Module 2: Entity- Relationship model- Relationship sets, Mapping, keys and entity sets. Entity Relationship diagram, specialization, generalization and aggregation.

Module 3: Relational algebra- Project, select, Cartesian product, joins, union, intersection.

Module 4: Normalization-Functional dependency, INF, 2NF, 3NF, BCNF, multivalued dependency & 4NF.

Module 5: Transaction- concepts, transaction state, concurrent executions, serializability, conflict serializability, view serializability.

Module 6: Concurrency control- locks, granting of locks, timestamp-based protocols, deadlock prevention, detection & recovery Module 7: Security- Authorization.

Module 8: Oracle: - Oracle functions, SQL, simple queries, nested sub-queries, selfjoin, equijoin, non-equijoin, PL/SQL programming (Writing small blocks for data Manipulation).

Course Outcomes: -After the completion of this course, students will be to:

- 1. Analyze data organization requirements and their inter relationships.
- 2. Illustrate the features of data models and their application for storing data.

- Dr. Shyama Prasad Mukherjee University
 - 3. Design queries to maintain and retrieve useful information from the databases created.
 - 4. Analyze the physical database design with respect to their expected performance using normalization and query processing.
 - 5. Examine the best practices according to concepts of indexing,
 - 6. transaction control and concurrency maintenance

Books Recommended:

- 1. DBMS -Korth
- 2. DBMS -C.J. Date
- 3. Oracle –Byross

Dr. Shyama Prasad Mukherjee University

SEMESTER- IV

COURSE CODE: -MJ-403PCOURSE TITLE: -LAB BASED ON DBMSCREDIT: -1

Write the following queries:

- 1. List all information about all department from emp table.
- 2. List all employee names along with their salaries from emp table.
- 3. List department names and locations from the dept table.
- 4. List the employees belonging to the department 20.
- 5. List the name and salary of the employees whose salary is more than 1000.
- 6. List the names of the clerks working in the department 20.
- 7. List the names of analysts and salesmen.
- 7. List the details of the employees who have joined before the end of September 81.
- 8. List the names of employees who are not managers.
- 9. List the names of employees whose employee number are 7369, 7521, 7839, 7934, 7788.
- 10. List the employee details not belonging to the department 10, 30, and 40.
- 11. List the employee name and salary, whose salary is between 1000 and 2000.
- 12. List the employees who are eligible for commission.
- 13. List the details of employees, whose salary is greater than 2000 and commission is NULL.
- 14. List the employees whose names start with an "S" (not"s").
- 15. List the name, salary and PF amount of all the employees(PF is calculated as 10% of salary).
- 16. List the empno, ename, sal in ascending order of salary.
- 17. List the employee name, salary, job and Department no descending order of Department No and salary.
- 18. List the employee details in ascending order of salary.
- 19. List the employee details in descending order of salary
- 20. Find the minimum salary of all employees.
- 21. Find the maximum, minimum, and average salaries of all employees.
- 22. List the maximum and minimum salary of each job type.
- 23. Find how many managers are in each dept.
- 24. Find the average salary and average total remuneration

each job type.Remembers sales man earn commission.

- 25. Find out the difference between highest and lowest salary.
- 26. Find all department s which have more than three employees.
- 27. Check whether all employee nos are unique. (No Duplicate)
- 28. List lowest paid employee working for each Manager. Exclude any groupswhere the minimum salary is less than 1000. Sort the output by salary.

Dr. Shyama Prasad Mukherjee University

SEMESTER- V

COURSE CODE	: -	MJ-501T
COURSE TITLE	: -	PROGRAMMING IN JAVA
CREDIT	: -	3

Time: 3 hours

Full Marks for End Semester: 60

Internal Assessment: 15 Marks (Mid Sem -10 & Assignment Work-5 Marks) No. of

Lectures: 45

Instruction to Question Setter for End Semester Examination (ESE 60 marks):

Group-A: Objective questions (Compulsory)	:	2 x 10 = 20
Group-B: short type questions (3 out of 5 questions)	:	3 x 5 = 15
Group-C: Descriptive Type Questions (2 out of 4 questions)	:	12.5x2 = 25
Total =		60

Module 1: Introduction to Java: History of Java, features of Java, types of Java programs. JDK Tools: Javac compiler, Java interpreter, applet viewer, Java tools, Javap disassemble, Javadoc Tool, JavahTool, Java keywords,

Module 2: Data types in Java, Variable naming conventions, Initializing variables, literals, operators, type conversion, construct, looping construct, Arrays and vectors.

Module 3: Classes and objects: Declaring classes, creating objects, declaring objects, declaring methods, passing arguments to methods,

Module 4: Constructors, access specifies (public, private, protected, Default), modifiers, the Method Overloading, Method Overriding, Garbage collection (Introduction).

Module 5: Inheritance: Introduction to Inheritance, Types of Inheritance Abstract class and Interface

Module 6: Introduction to threads: Threads, Single threaded and multithreaded applications, life cycle of a Thread, the current thread, the thread class, Problems in multithreading.

Module 7: Packages: Java packages, using a package, the Lang packages, the package, the creating a package.

Module 8: Applets & Applications: Applet class, Applet & HTML, Life cycle of an Applet, Graphic class (Introduction), passing parameters to Applets, Creating an application

Course Outcomes: -After the completion of this course, students will be to:

- 1. Use the knowledge of object oriented programming through Java
- 2. Identify the difference between procedural and OO programming.
- 3. Successfully use the JDK of various versions for programming,

Department of Information Technology

Dr. Shyama Prasad Mukherjee University

- 4. Apply latest know-how related to the new developments in the field of Java
- 5. Construct programs using various OOP principles,
- 6. Design UI using JAVA GUI components.
- 7. Operate on files and strings in real life scenarios. Analyze thread performance and inter thread communication issues

Books Recommended:

- 1. Java- Complete Reference
- 2. Mastering Java

SEMESTER- V

COURSE CODE	: -	MJ-501P
COURSE TITLE	: -	LAB BASED ON JAVA
CREDIT	: -	1

List of java program as assignment

1. WAJP to show the characteristic of a number. {E.g. 24 it has two coefficients 2 in tens position and 4 in units position. It is composed of 2 and 3. It is a positive number. Also show whether it is odd or even.

2. WAJP to take input through command line argument and do the following:

a) Check whether the number is prime.

b) Generate the reverse a number.

3. Write a menu driven program using switch in Java to perform following:

a) For input of 1, check whether the number is prime

b) For input of 3, find the factors of the number

c) For input of 5, check the number is odd or even.

4. Write a program in Java to generate hexadecimal equivalent of a number without using array.

5. WAJP to take two number inputs through command line argument and do the following:

a) Check whether two numbers are prime to each other or not.

b) Find LCM of two numbers.

6. WAJP to create a class and exhibit the role of static functions (other than main) by declaring, defining and calling them.

7. WAJP to compute and display the count of occurrence of 4 in a number. E.g. 4564 will compute 2.

8. WAJP to sort a list of numbers in ascending order.

9. Write a program in Java to take input of two 3×3 matrices through command line argument and then:

a) Add them up and display the result

b) Subtract them and display the result

c) Multiply them and display product

10. WAJP to count the number of words, characters in a sentence.

11. Write a program in Java to take input of a sentence through command line argument and then count the number of words and vowels.

12. WAJP to handle the Exception using try and multiple catch block; the exceptions that you will handle are, number format error, array bound error and divide by zero.

13. WAJP to create a class called Room with two data member length and width and then implement constructor overloading in it.

14. WAJP to create a class called Fraction with data member numerator and denominator; take input (through command line argument) of two fractions and then add, subtract, multiply and divide, finally display the result in reduced term.

15. Write a program in Java to create a class for Employee having 2 data member code and name. Then create 3 classes Officer, Admi Staff and MStaff. The Officer class has data members designation and

Dr. Shyama Prasad Mukherjee University

pay-scale; the Admi Staff has data members grade and pay-band; the MStaff has data member department and two sub-classes Regular and Casual. The Regular staff has data members level and consolidated-pay and Casual has data member daily-wage. Take all inputs through constructors and write appropriate methods for displaying one data for each type of class.

16. WAJP to design a class called Account using the inheritance and static that show all function of bank (withdrawal, deposit) and generate account number dynamically.

- 17. Write a program in Java to explain the role of the following:
 - a) Non-parameterized constructor
 - b) Parameterized constructor
 - c) Copy constructor

16. WAJP to design an application Password.java that produces and prints a random password depending upon name of an individual. If the input is Abdul Kalam, then the password would be 33421LAM. Note: take the first name A=1, B=2, D=4, U=21 where 2+1=3, and L=12, where 1+2=3; so the number comes to be 12433, so u can find out.

17. WAJP to take a string count all vowels and then delete the same from the string.

18. Write a Patient class which inherits from the Person class. Patient can again be of two types, indoor and outdoor. The Patient class requires the following:

- a) a variable to store the patient ID for the patient
- b) a variable to store the department of hospital
- c) a variable to store the ward of hospital
- d) a variable to store the patient 's date of joining the hospital
- e) a variable to store the patient 's address
- f) a variable to store the medical fees that the patient pays
- g) constructor methods, which initialize the variables
- h) a method to calculate the medical fees (for both indoor and outdoor patient)

19. Write a class called **Shape** which contains a user-defined interface for **Computation**, which contains methods for calculation of area, perimeter and volume. Write four classes for **circle**, **rectangle**, **sphere** and **rectangular parallelepiped**, and all these classes inherit from Shape. Now take input for the following:

radius of circle and compute its area and perimeter Length and breadth of rectangle and compute its area and perimeter Length, breadth and height for **rectangular parallelepiped** and compute its area and volume

Radius of sphere and compute its area and volume

Dr. Shyama Prasad Mukherjee University

Lectures: 45

Instruction to Question Setter for End Semester Examination (ESE 60 marks):

Group-A: Objective questions (Compulsory)	:	2 x 10 = 20
Group-B: short type questions (3 out of 5 questions)	:	3 x 5 = 15
Group-C: Descriptive Type Questions (2 out of 4 questions)	:	12.5x2 = 25
Total =		60

- Module 1: Introduction: What Is Object-Oriented? What Is Object Oriented Development? Object Oriented Theme.
- Module 2: Modeling as a Design Technique: Modeling, Abstraction, The three models.
- Module 3: Class Modeling: Object and class concepts, link and association concepts, Generalization and inheritance, a sample class model. Advanced class Modeling: Aggregation, abstract classes, multiple inheritances, metadata, and constraints.
- Module 4: State Modeling: Events, states, state diagrams. Advanced states Modeling: Nested state diagrams, nested states, concurrency, a sample state model.
- Module 5: Interaction Modeling: Use case models, sequence models, activity models, Data Flow Diagrams
- Module 6: Process Overview: Development states, Development life cycle.
- **Module 7: System Design:** Overview of system design, breaking a system into subsystems, indentify concurrency, allocation of subsystems, management of data storage, handling global resources, choosing a software control strategy, handling boundary conditions, setting trade-off priorities, common Architectural styles, architecture of the ATM system.
- Module 8: Programming style: Object-Oriented Style, Reusability, Extensibility, Robustness, Programming in-the-Large.

Course Outcomes: -After the completion of this course, students will be to:

Department of Information Technology

- Explain the features of database management systems and Relational database
- 2. Design the ER-models to represent simple database application scenarios.
- Applying UML, it collects the requirements and prepare their scenarios and design.
- 4. Understand the functional dependencies and design of the database.

Book Recommended

1. Michael R Blaha and James R Rumbaugh– Object Oriented Modeling and Design, PHI, New Delhi, 2003

Dr. Shyama Prasad Mukherjee University

SEMESTER- V

COURSE CODE	: -	MJ-502P
COURSE TITLE	: -	Lab Based on Object Oriented with UML
CREDIT	: -	1

- 1. Draw a **Class diagram** for Library Management System.
- 2. Draw a **Class diagram** for College Management System.
- 3. Draw a Use Case diagram for Online Banking System.
- 4. Draw a Use Case diagram for Bank ATM System.
- 5. Draw a **State diagram** for Telephone line System.
- 6. Draw a **Data flow diagram** for hotel management system.
- 7. Draw a **Data flow diagram** for railway management system.
- 8. Draw an Activity diagram for student management system.

Draw an Activity Diagram for stock trade processing system.
 Draw a Sequence diagram for online stock broker.

- Create the Initial Class Diagram
- Create Subsequent Class Diagrams
- Saving Edited Diagrams and Reflecting those Changes in the Code
- Editing Code and Reflecting those Changes in the Diagram
- Adding Existing Classes or Interfaces to a Diagram
- Adding New Classes or Interfaces to a Diagram
- Adding Inheritance Relationships Between Classes and/or Interfaces
- Adding Association Relationships Between Classes
- Adding Fields to Classes
- Adding Methods to Classes and Interfaces

Dr. Shyama Prasad Mukherjee University

SEMESTER- V

COURSE CODE	: -	MJ-503T
COURSE TITLE	: -	WEB TECHNOLOGY
CREDIT	: -	3

Time: 3 hours

Full Marks for End Semester: 60

Internal Assessment: 15 Marks (Mid Sem -10 & Assignment Work-5 Marks) No. of

Lectures: 45

Instruction to Question Setter for End Semester Examination (ESE 60 marks):

Group-A: Objective questions (Compulsory)	:	2 x 10 = 20
Group-B: short type questions (3 out of 5 questions)	:	$3 \times 5 = 15$
Group-C: Descriptive Type Questions (2 out of 4 questions)	:	12.5x2 = 25
Total =		60

Module 1: History of the Internet and World Wide Web, Search Engines, News-group, Email and its Protocols, Web Portal, Browsers and their versions, Its functions, URLs, web sites

Module 2: Static Web Development: HTML - Introduction to HTML, HTML Document structure tags, HTML comments, Text formatting, inserting special characters, anchor tag, adding images and Sound, lists types of lists, tables, frames and Developing Forms

Module 3: DHTML: Introduction to DHTML, JavaScript &DHTML, Document Object Model, DHTML Events, Dynamically change style to HTML Documents.

Module 4: Cascading Style Sheet: Types of Style Sheets – Internal, inline and External style sheets, creating styles, link tag.

Module 5 Introduction to Java Script: Data Types, Control Statements, operators, Functions, Objects in Java Script, Handling Events.

Module 6 Server-Side-Scripting -Server-side -scripting and Client-side-scripting, Differences between ASP and ASP.NET. ASP.NET Web Forms: The code behind Web Form-Separations of content, Web Form Page-Stages in Web Form Processing.

Module 7: Introduction to ADO.NET: Comparison between ADO & ADO.NET—The difference between Connection Model & Disconnected Model – difference between the Dataset and Record Set-

Course Outcomes: -After the completion of this course, students will be to:

Department of Information Technology

- 1. Describe the components of the Internet and Web technology,
- Explain the basics of Internet technology, such as http and the World Wide Web,
- 3. HTML, and JavaScripts; Create WWW pages to serve as front-end to client/server,
- 4. Internet applications
- Analyzing and designing Internet applications and testing and documenting the solutions developed

Books Recommended:

1. HTML DHTML Java Script VB Script – Ivan Bayross

Black Book: Holzner

Dr. Shyama Prasad Mukherjee University

SEMESTER- V

COURSE CODE	: -	MJ-503P
COURSE TITLE	: -	LAB BASED ON WEB TECHNOLOGY
CREDIT	: -	1

Q.1 Create an HTML document with the following formatting options: I. Bold II. Italics III. Underline IV. Headings (Using H1 to H6 heading styles) V. Font (Type, Size and Color) VI. Background (Colored background/Image in background) VII. Paragraph VIII. Line Break IX. Horizontal Rule X. Pre tag Q.2 Create an HTML document which consists of: I. Ordered List II. Unordered List III. Nested List IV. Image

Q.3 Create an HTML document which implements Internal linking as well as External linking. Q.4 Create a table using HTML which consists of columns for Roll No., Student's name and grade.

Q.4. Create a form using HTML which has the following types of controls: I. Text Box II. Option/radio buttons III. Check boxes IV. Reset and Submit buttons

5. Design a web page with Imagemaps.

6. Design a web page demonstrating different semantics

7. Design a web page with different tables. Design a webpages using table so that the content appears well placed.

8. Design a web page with a form that uses all types of controls.

9. Design a web page embedding with multimedia features.

10. Using JavaScript design, a web page that prints factorial/Fibonacci series/any given series.

- 11. Design a form and validate all the controls placed on the form using Java Script.
- 12. Write a JavaScript program to display all the prime numbers between 1 and 100.

13. Write a JavaScript program to accept a number from the user and display the sum of its digits.

- 14. Write a HTML code that displays various formatting tags.
- 15. Write a HTML code to create ordered list.
- 16. Write a HTML code to create unordered list.
- 17. Write a HTML code to create table having 5 rows and 5 columns.
- 18. Write a HTML code to create admission form.
- 19. Write a HTML code to create a frame.
- 20. Write a HTML code to create image map.
- 21. Write a HTML code to create hyperlink b/w multiple pages.
- 22. Write a DHTML code to create cascading style sheet.

Department of Information Technology

Dr. Shyama Prasad Mukherjee University

- 23. WRITE A PROGRAM in JavaScript to show a number is big or not.
- 24. WRITE A PROGRAM in JavaScript to implement for loop.
- 25. WRITE A PROGRAM in JavaScript to show the usage of if statement.
- 26. WRITE A PROGRAM in JavaScript to show the usage of if-else statement.
- 27. WRITE A PROGRAM in JavaScript to show function with an arguments.
- 28. WRITE A PROGRAM in JavaScript to show number is even or odd.
- 29. WRITE A PROGRAM in JavaScript to show number is prime or not.

Dr. Shyama Prasad Mukherjee University

SEMESTER- V

COURSE CODE	: -	INT-501P
COURSE TITLE	: -	INTERNSHIP
CREDIT	: -	4

Students are advised to pursue the Internship Course in the following period:

- I.Break between II & III Semester of one paper containing 4 Credits (Compulsory for all students) or
- II. Break between IV & V Semester of one paper containing 4 Credits (Compulsory for all students) or
- III. During V Semester of one paper containing 4 Credits (Compulsory for all students).

SEE: ANNEXURE-NEP 2020

INTERNSHIP GUIDELINES

Internship: A course requiring students to participate in a professional activity or work experience, or cooperative education activity with an entity external to the education institution, normally under the supervision of an expert of the given external entity. A key aspect of the internship is induction into actual work situations. Internships involve working with local industry, government or private organizations, business organizations and similar entities to provide opportunities for students to actively engage in on-site experiential learning.

The main reason students need to do internship is so they are well prepared for a graduate job in their chosen field. It is a chance for you to put what you have learned at university to work in the kind of real-life situations you will come up against when you start your career. internship gives you great experience during your degree including:

- First-hand experience working as a professional Developer.
- Apply your technical knowledge to a real-life situation.
- Work with other professionals related to your industry.
- Experience what it's like to work in a professional organisation.
- Increase your technical, interpersonal and communication skills.
- Observe interactions of engineers with other professional groups.
- Witness the functioning and organisation of business and companies

DEPARTMENT OF INFORMATION TECHNOLOGY Dr. Shyama Prasad Mukherjee University

Student have to do 60 hours industrial Training from two different IT organizations. Student has to produce daily report. In this daily report, Attendee sheet, Work culture and working hour list day by day, must be listed.

Academic Credits for training shall be based on following:

A Power Point presentation (based on the report) for duration of 10 minutes should be make. This will be presented in front of examiners. Marks will be awarded on this presentation and documents submitted.

Course Outcomes: -After the completion of this course, students will be to:

- I. The main Objective, students need to do internship is so they are well prepared for a graduate job in their chosen field.
- **II.** It is a chance to put what have learned at university to work in the kind of reallife situations it will come up against when it start their career.

Dr. Shyama Prasad Mukherjee University

SEMESTER- VI

COURSE CODE	: -	MJ-601T
COURSE TITLE	: -	SOFTWARE ENGINEERING
CREDIT	: -	3

Time: 3 hours

Full Marks for End Semester: 60

Internal Assessment: 15 Marks (Mid Sem -10 & Assignment Work-5 Marks) No. of

Lectures: 45

Instruction to Question Setter for End Semester Examination (ESE 60 marks):

Group-A: Objective questions (Compulsory)	:	2 x 10 = 20
Group-B: short type questions (3 out of 5 questions)	:	$3 \times 5 = 15$
Group-C: Descriptive Type Questions (2 out of 4 questions)	:	12.5x2 = 25
Total =		60

Module 1: Software : Characteristics, Components and Applications, Software process, Software Engineering – A layered Technology, The software process, Software Process models, Linear Sequential Model, Prototyping Model, RAD Model and Evolutionary Software Models.

Module 2: Software Process & Project Metrics: Metrics in Project & Process Domains, Software Measurement and Metrics for Software Quality,

Module 3: Project Planning Objectives: Software Scope, resources, Software Project Estimation, Decomposition Techniques, Empirical estimation Models, Make-Buy decision.

Module 4: Risk Management: Software risks, Risk Identification, Projection, Defining Task set for software Project, selecting software engineering tasks, scheduling and project plan,

Module 5: Software Quality Assurance. Software reviews, Formal approach to SQA Software Reliability, The SQA plan.

Module 6: Conventional Methods for Software Engg : System Engg. Product Engg., Modeling the System, Architecture, System specifications

Module 7: Analysis Concepts & Principles, Software prototyping, Specifications, Analysis Modeling, Design Concepts, Principles & Methods, Design for real-time system, Software Testing Methods

Course Outcomes: -After the completion of this course, students will be to:

1. Explain the software engineering principles and techniques

- 2. Apply Software Project Management Practices,
- 3. Apply the knowledge gained for their project work as well as to develop software following software engineering standards.
- 4. Develop self-reliance, technical expertise, and leadership.

Books Recommended:

1. Roger S. Pressman – Software Engineering – A Practitioner's Approach – McGraw

Hill.

2. Richard Fairley – Software Engineering Concepts, TATA McGraw Hill

Dr. Shyama Prasad Mukherjee University

SEMESTER- VI

COURSE CODE	: -	MJ-601P
COURSE TITLE	: -	LAB BASED ON SOFTWARE ENGINEERING
CREDIT	: -	1

Lab based on Software Engineering

- 1. Practical Title
 - Problem Statement,
 - Process Model
- 2. Requirement Analysis
 - Creating a Data Flow
 - Data Dictionary,
 - Use Cases
- 3. Project Management
 - Computing FP
 - Effort
 - Schedule, Risk Table, Timeline chart
- 4. Design Engineering
 - Architectural Design
 - Data Design, Component Level Design
- 5. Testing
 - Basis Path Testing

Dr. Shyama Prasad Mukherjee University

SEMESTER- VI

COURSE CODE	: -	MJ-602T
COURSE TITLE	: -	DATA MINING AND WAREHOUSING
CREDIT	: -	3

Time: 3 hours

Full Marks for End Semester: 60

Internal Assessment: 15 Marks (Mid Sem -10 & Assignment Work-5 Marks) No. of

Lectures: 45

Instruction to Question Setter for End Semester Examination (ESE 60 marks):

Group-C: Descriptive Type Questions (2 out of 4 questions)	:	12.5x2 = 25
Total =		60

Module 1: Overview and Concepts of Data Warehousing. Overview of Data warehousing Strategic information and the need for Data warehousing, Evolution of Data warehousing, Data warehousing and Business Intelligence the Building Blocks of Data warehouse.

Module 2: Defining features - Subject-oriented data, Integrated data, Time-variant data, Nonvolatile data, Data granularity Data warehouses and Data marts Architectural Types - Centralized, Independent data marts, Hub-and-Spoke.

Module 3: Data Staging, Data Storage, Information Delivery, Metadata, and Management and Control components Business Requirements and Data warehouse Requirement Gathering methods and Requirements Definition Document (contents) Business Requirements and Data Design - Structure for Business Dimensions and Key Measurements.

Module 4: Implementation And Maintenance: Physical design process, Aggregates and Indexing. Data Warehouse Deployment.

Module 5: Data Mining Overview of Data mining - Definition, Knowledge Discovery Process (Relationships, Patterns, Phases of the process), OLAP versus Data mining Some aspects of Data mining - Association rules, Outlier analysis, Predictive analytics etc. Concepts of Data mining in a Data warehouse environment.

Module 6: Data Mining Classifiers Classification Algorithms: What is Classification? Supervised Learning, Classifier Accuracy, Decision Tree and Naïve Bayes Classifier (In brief introduction) Algorithms

Course Outcomes: -After the completion of this course, students will be to:

1. Illustrate the fundamentals of data mining systems as well as issues related to

access and retrieval of data at scale.

- Dr. Shyama Prasad Mukherjee University
 - 2. Explain the various data mining functionalities and data warehousing techniques.
 - 3. Apply the various data mining techniques to solve classification,
 - 4. Clustering and association rule mining problems
 - 5. Design and evaluate data mining models to be used in solving real life problems,
 - 6. keeping in view social impacts of data mining.

Books Recommended:

1. Data Warehousing Fundamentals for IT Professionals, Second Edition by Paulraj Ponniah, Wiley

2. Data Warehousing, Data Mining, & OLAP - Second Edition by Alex Berson and Stephen J. Smith, Tata McGraw Hill Education

Dr. Shyama Prasad Mukherjee University

SEMESTER- VI

COURSE CODE	: -	MJ-602P
COURSE TITLE	: -	DATA MINING AND WAREHOUSING
CREDIT	: -	1

- 1. Orange Data Mining
- 2. Orange Widgets
- 3. Loading your Data
- 4. Exporting Models
- 5. Exporting Visualizations
- 6. Learners as Scorers
- 7. Report
- 8. CSV File Import
- 9. Random Forest
- 10. SVM
- 11. Naive Bayes
- 12. Neural Network
- 13. Statistical analysis with different types of data's.

Dr. Shyama Prasad Mukherjee University

SEMESTER- VI

COURSE CODE	: -	MJ-603T
COURSE TITLE	: -	CYBER SECURITY
CREDIT	: -	3

Time: 3 hours

Full Marks for End Semester: 60

Internal Assessment: 15 Marks (Mid Sem -10 & Assignment Work-5 Marks) No. of

Lectures: 45

Instruction to Question Setter for End Semester Examination (ESE 60 marks):

Group-A: Objective questions (Compulsory)	:	2 x 10 = 20
Group-B: short type questions (3 out of 5 questions)	:	$3 \times 5 = 15$
Group-C: Descriptive Type Questions (2 out of 4 questions)	:	12.5x2 = 25
Total =		60

Module 1: Cyber Security: Introduction of cyber security, History of cyber security, Types of cyber security, the importance of cyber security, Goals of cyber security

Module 2: Cyber Attacks: Classification of cyber-attacks, MITM attacks, Types of cyber-Attackers, Cyber security principles

Module 3: Data Security consideration: Backups, Archival of data and Disposal of data.

Module 4: Security Technologies: Firewall and VPN, Intrusion Detection, Access Control

Module 5: Security Threats to Ecommerce: electronic payments system, e-cash, data misuse, credit/debit card frauds; Security Policies: Need of security policies

Module 6: Cyber Security Standards, Cyber Security Digital Signature, Types of Digital Signature

Module 7: Cyber Security tools: Firewalls, anti-virus software, PKI Services, Managed detection and Response Service; Cyber Security challenges

Module 8: Cyber Security Risk Analysis, Benefits of Risk Analysis, Types of Risk Analysis, Email Security, Needs of Secure Email Service,

Course Outcomes: -

After the completion of this course, students will be to:

Analyze and resolve security issues in networks and computer systems

to secure an IT infrastructure.

2. Design, develop, test and evaluate secure software. Develop policies

and procedures to manage enterprise security risks.

- 3. Construct a strategy to Safeguard the society from cybercrime.
- 4. Organize the evidence in terms of court terminology.
- 5. Define the legal issues and its applications.
- Apply Computer forensics and digital detective and various processes, policies and procedures.
- Compose the techniques to produce data from computer and hand held devices.

Book Recommended

- 1. C. P. Pfleeger, S. L. Pfleeger; Security in Computing, Prentice Hall of India,
- 2. W. Stallings; Network Security Essentials: Applications and Standards,

Dr. Shyama Prasad Mukherjee University

SEMESTER- VI

COURSE CODE: -MJ-603PCOURSE TITLE: -CYBER SECURITYCREDIT: -1

- 1) Introduction to data security
- 2) Configuring Endpoint Security
- 3) Common threats to a wireless network
- 4) Configuring a web browser
- 5) Email security concepts
- 6) Securing mobile platforms
- 7) Securing the cloud
- 8) Securing network connections
- 9) Using data destruction and disposal methods
- 10) Configuring file system security
- 11) Administering user and group accounts
- 12) Securing Windows
- 13) Configuring and running Windows Update
- 14) Configuring Firewall on Windows
- 15) Encryption
- 16) Data backup and disaster recovery
- 17) Implementing basic disaster prevention and recovery methods
- 18) Managing system maintenance tools
- 19) Social networking security
- 20) IM security

Dr. Shyama Prasad Mukherjee University

SEMESTER- VI

COURSE CODE	: -	MJ-604P
COURSE TITLE	: -	PROJECT WORK
CREDIT	: -	4

Internal Assessment: 25 Marks

External Assessment: 75 Marks

PROJECT WORK/ DISSERTATION:

- 1. The students will be allowed to work on any project based on the concepts studied in core / elective or skill based elective courses.
- 2. Student have to do a complete project, the technologies (front end + back end) should be chosen among the syllabus, where the front end will be designing & coding portion and back end will be database portion.
- 3. Student have to run the code as a live project and submit CD containing supporting software, frontend and backend coding in proper format.

Guidelines to Examiners for End Semester Examination (ESE Pr): Project Evaluation (By Internal & External) may be as per the following guidelines:

Assigned by Internal Guide Pre-Submission (Power Point Presentation) = 25 marks

Assigned by External Examiner Programme Running in system = 40 marks Project Report (Hard Copy) = 10 marks Viva-voce = 25 marks

PROJECT GUIDELINES

Student must follow the below guidelines

- 1. Synopsis Submission
- 2. Synopsis Approval will be given within a week from the date of submission.
- 3. A Power Point presentation (based on the report) for the duration of 10 minutes should be

make. This will be presented in front of Examiners.

- 4. Faculty members will be the internal guide of each students.
- 5. Synopsis contains
 - a) Title of the Project.

Department of Information Technology

Dr. Shyama Prasad Mukherjee University

- b) Introduction of the Project.
- c) Objective of the Project.
- d) Platform used (Hardware/Software).
- e) Module of the project.
- f) Project Type
- g) System Design
 - I. Data Flow Diagram.
 - II. Entity-Relationship Diagram.
 - III. Object Diagram.
 - IV. Class Diagram.
 - V. Gantt and Pert Chart.
 - VI. Activity diagram.
 - VII. Collaboration diagram.
- h) Conclusion.
- i) Limitation of the Project.
- j) Future Scope of the Project.
- 6. Final Project Submission contains Hardcopy and Softcopy

Project Hardcopy contains

- a) Front page
- b) Certificate of Authenticity
- c) Certificate of Internship
- d) Declaration
- e) Acknowledgement
- f) Table of content/index
- g) Project Guidelines
 - i. Introduction
 - ii. Vision, mission, objective
 - iii. Swot analysis

Dr. Shyama Prasad Mukherjee University

- iv. Chronology of Achievements.
- v. Topic discussion
- vi. Platform used (Hardware/Software).
- vii. Module of the project.
- viii. Project Type
- ix. System Design
 - a) Data Flow Diagram.
 - b) Entity-Relationship Diagram.
 - c) Object Diagram.
 - d) Class Diagram.
 - e) Gantt and Pert Chart.
 - f) Activity diagram
 - g) Collaboration diagram
- x. Its relevance and implication in company.
- xi. Finding
- xii. Conclusion
- xiii. Limitation of the project
- xiv. Further Enhancement
- xv. Bibliography
- 7. Project that assigned to the student should be executed (run) during viva of project

Dissertation.

- 8. Documentation of Synopsis/ Project must be well formatted.
- 9. Main text of Synopsis/ Project should be typed on A4 size paper in Font Times New Roman (Size 12) with margin: Left 1.5", Right: 1", Top: 1", Bottom: 1" and arranged in suitable sections like introduction, Problem Definition, Computational / Design, Results and Discussion, Conclusion, Future Scope of Work, References, Appendix (if any). The Project must be hard cover bound.
- 10. Contents of the final project also include coding and snapshot of the executed project.

Dr. Shyama Prasad Mukherjee University

SEMESTER- VII

COURSE CODE	: -	MJ-701P
COURSE TITLE	: -	LAB BASED ON PYTHON PROGRAMMING
CREDIT	: -	1

Suggested Practical List

1. WAP to calculate total marks, percentage and grade of a student. Marks obtained in each of three subjects are to be input by the user. Assign grades according to the following criteria: Grade A : if Percentage >=80

Grade B : if Percentage >=60 and Percentage <80

Grade C : if Percentage >=40 and Percentage <60

Grade D : if Percentage <=40

- 2. WAP to print factors of a given number.
- 3. WAP to add N natural numbers and display their sum.

4. WAP that takes a positive integer n and the produce n lines of output as shown:

* *

*

* * *

* * * *

(for n = 4)

5. Write a menu driven program using user defined functions to print the area of rectangle, square, circle and triangle by accepting suitable input from user.

6. Write a function that calculates factorial of a number n.

7. WAP to print the series and its sum: (use functions)

 $1/1! + 1/2! + 1/3! \dots 1/n!$

8. WAP to perform the following operations on an input string

a. Print length of the string

b. Find frequency of a character in the string

c. Print whether characters are in uppercase or lowercase

9. WAP to create two lists: one of even numbers and another of odd numbers. The program should demonstrate the various operations and methods on lists.

10. WAP to create a dictionary where keys are numbers between 1 and 5 and the values are the cubes of the keys.

11. WAP to create a tuple t1 = (1,2,5,7,2,4). The program should perform the following:

a. Print tuple in two lines, line 1 containing the first half of tuple and second line having the second half.

b. Concatenate tuple t2 = (10,11) with t1.

COURSE CODE	: -	MJ-702T
COURSE TITLE	: -	COMPUTER MULTIMEDIA AND ANIMATION
CREDIT	: -	3

Time: 3 hours

Full Marks for End Semester: 60

Internal Assessment: 15 Marks (Mid Sem -10 & Assignment Work-5 Marks) No. of

Lectures: 45

Instruction to Question Setter for End Semester Examination (ESE 60 marks):

· :	$12.5x^2 = 25$
	60
	: : :

Module 1: Introduction: Definition Multimedia and uses, applications, Hardware and Software requirements, multimedia presentation and authoring tools, and multimedia, multimedia, animation techniques, shading, anti-aliasing, morphing: video on demand.

Module 2: Text and Graphics: Uses of text in multimedia, families and faces of fonts, outline fonts, bitmap fonts, international characters sets and hypertext digital font techniques. Graphics- Introduction, types, color and color models, color palettes, vector drawing, 3-D drawing and rendering, making still images, editing and capturing images.

Module 3: Audio and Video: Digital representation of sound, MIDI audio, MIDI vs. Digital Audio, Audio file formats, Adding sound to your multimedia project, Audio software and hardware, Video basic, how video works, broadcast video standard, Analog video, Digital video, shooting and editing video, video compression and file format.

Module 4: Animation and multimedia authoring: Introduction, principles, types and uses, cell animation, computer animations, morphing, Animation software compression techniques: need and types of compression- lossy and lossless, CODECs, authoring basic, types of authoring tools.

Module 5: Multimedia on the web: Introduction, Bandwidth, text on the web- Dynamic and embedded font technology, Audio and video on the web, buffering and streaming, webcasting, video conferencing.

Books Recommended:-

SEMESTER- VI

COURSE CODE	: -	MJ-702P
COURSE TITLE	: -	LAB BASED ON MULTIMEDIA AND ANIMATION
CREDIT	: -	1

Suggested Practical List

- 1. Create an animated scene using the tools panel and the properties panel.
- 2. Create an animation using Free transform tool that should use
- Move objects
- Skew objects
- Rotate objects
- Stretch objects while maintaining proportion
- 3. Create an animation of Text using font, size, color and lighting effect.
- 4. Modify the document (changing background color etc.) using the following tools
- Eraser tool
- Hand tool
- Ink bottle tool
- Zoom tool
- Paint Bucket tool
- Eyedropper tool
- 5. Create an animated Flag

6. Create a scene to show animated walk and run cycles (using multiple layers and motion tweening)

7. Create an animation having an image having morphing effect.

8. Create an animation using (Shape Tweening and shape hints) for transforming one shape into another.

- 9. Create an animation of a cartoon picture using sound.
- 10. Create an animation of a character using key frames.
- 11. Create an animation for a bouncing ball (use motion guide layer)
- 12. Create an animated scene of rain using the ripple effect.

Instruction to Question Setter for End Semester Examination (ESE 60 marks):

Group-A: Objective questions (Compulsory)	:	2 x 10 = 20
Group-B: short type questions (3 out of 5 questions)	:	3 x 5 = 15
Group-C: Descriptive Type Questions (2 out of 4 questions)	:	12.5x2 = 25
Total =		60

Module 1: IOT - What is the IoT and why is it important? Elements of an IoT ecosystem, Technology drivers, Business drivers, Trends and implications, Overview of Governance, Privacy and Security Issues.

Module 2: IOT PROTOCOLS - Protocol Standardization for IoT – Efforts – M2M and WSN Protocols – SCADA and RFID Protocols – Issues with IoT Standardization – Unified Data Standards – Protocols – IEEE802.15.4–BACnet Protocol– Modbus – KNX – Zigbee– Network layer – APS layer – Security

Module 3: IOT ARCHITECTURE - IoT Open source architecture (OIC)- OIC Architecture & Design principles- IoT Devices and deployment models- IoTivity : An Open source IoT stack - Overview- Iotivity stack architecture- Resource model and Abstraction.

Module 4: WEB OF THINGS - Web of Things versus Internet of Things – Two Pillars of the Web – Architecture Standardization for WoT– Platform Middleware for WoT – Unified Multitier WoT Architecture – WoT Portals and Business Intelligence.

Module 5: IOT APPLICATIONS - IoT applications for industry: Future Factory Concepts, Brownfield IoT, Smart Objects, Smart Applications. Study of existing IoT platforms /middleware, IoT- A, Hydra etc

Books Recommended : Text: • Honbo Zhou, "The Internet of Things in the Cloud: A Middleware Perspective", CRC Press,2012.

• Dieter Uckelmann, Mark Harrison, Michahelles, Florian (Eds), "Architecting the Internet of Things", Springer, 2011.

Dr. Shyama Prasad Mukherjee University

SEMESTER- VII

COURSE CODE	: -	MJ-703P
COURSE TITLE	: -	LAB BASED ON JAVASCRIPT
CREDIT	: -	1

Create event driven programs for the following:

- 1. Enter a number and on click of a button print its multiplication table.
- 2. Print the largest of three numbers entered by the user.
- 3. Find the factorial of a number entered by the user.

4. Enter a list of positive numbers using the prompt terminated by a zero. Find the sum and average of these numbers.

Create a student registration form using text, radio button, check box, drop down box, text field and all other required HTML elements. Customise the CSS and javascript to input and validate all data. Create functions to perform validation of each element, example:

- a. Roll number is a 7-digit numeric value
- b. Name should be an alphabetical value(String)
- c. Non-empty and valid fields like DOB

jQuery and JSON

- 1. Change text color and contents using button click events using jQuery
- 2. Select elements using ID, class, elements name, attribute name
- 3. Run code on click events in jQuery
- 4. Handle HTML form, store the data in JSON object, pass them to another page and display

it there using jQuery/Javascript

Dr. Shyama Prasad Mukherjee University

SEMESTER- VII

COURSE CODE	: -	MJ-704T
COURSE TITLE	: -	E-COMMERCE AND APPLICATION
CREDIT	: -	3

Time: 3 hours

Full Marks for End Semester: 60

Internal Assessment: 15 Marks (Mid Sem -10 & Assignment Work-5 Marks) No. of

Lectures: 45

Instruction to Question Setter for End Semester Examination (ESE 60 marks):

Group-A: Objective questions (Compulsory)	:	2 x 10 = 20
Group-B: short type questions (3 out of 5 questions)	:	$3 \times 5 = 15$
Group-C: Descriptive Type Questions (2 out of 4 questions)	:	12.5x2 = 25
Total =		60

Module 1:	Introduction to e-commerce, Advantages and Disadvantage of Ecommerce,		
	Types of E-Commerce EDI-electronic data interchange, Benefits of EDI,		
	Component of EDI System.		
Module 2:	Introduction to UN/EDIF ACT standard, An EDIFACT Message, Interchange		
	Structure, Un/EDIFACT message Directories.		
Module 3:	Internet & Extranets, Commerce over the Internet, Commerce over the		
Extranet			
	Identification & tracking tools, EAN system, Eancom, Article numbering, bar		
	Coding.		
Module 4:	Business process Re-engineering, Strategic Alignment Model BPR		
	Methodology. Rapid Re Methodology, Management of change.		
Module 5:	Concerns for e-commerce growth - Legal issues, Risks, Technology for		
	Authenticating Electronics Document, Laws for E-Commerce, Legal issues for		
	internet commerce.		
Module 6:	Cyber security, Cyber-attacks, Hacking, Firewalls, cryptography-based		
	solutions, Digital Signature		
Module 7:	Information Technology act 2000, Public Key Infrastructure, PKI and		
	Certifying Authorities		
Module 8:	Electronic payment system, Payment gateway and Internet banking, Pay pal,		
	Secure Electronic Transaction (SET) protocol		
Course O	utcomes: -		

After the completion of this course, students will be to:

1. Focuses on the three major driving forces that permeate all aspects of e-

commerce:

2. business development and strategy,

Dr. Shyama Prasad Mukherjee University

- 3. Technological innovations, and social and legal issues and impacts.
- 4. Covers E-commerce technology infrastructure
- 5. Business concepts,
- 6. social issues and real world experiences.

Books Recommended:

- 1.K. K. Bajaj & D. Nag TMH
- 2.Rayport & Jawors

Dr. Shyama Prasad Mukherjee University

SEMESTER- VII

COURSE CODE:-MJ-704PCOURSE TITLE:-LAB BASED ON E-COMMERCECREDIT:-1

- 1. Is It a Good Idea to Sell Hardware Tools Online?
- 2. Will People Buy Ice Cream Online?
- 3. O'Reilly to Move Electronic Components Catalog Online
- 4. Case Industry Overview: Online Services and Storage
- 5. Amazon Buys Video-game Streaming Site Twitch for \$970M

Dr. Shyama Prasad Mukherjee University

SEMESTER- VIII

COURSE CODE	: -	MJ-801T
COURSE TITLE	: -	DIGITAL IMAGE PROCESSING
CREDIT	: -	3

Time: 3 hours

Full Marks for End Semester: 60

Internal Assessment: 15 Marks (Mid Sem -10 & Assignment Work-5 Marks) No. of

Lectures: 45

Instruction to Question Setter for End Semester Examination (ESE 60 marks):

Group-A: Objective questions (Compulsory)	:	2 x 10 = 20
Group-B: short type questions (3 out of 5 questions)	:	3 x 5 = 15
Group-C: Descriptive Type Questions (2 out of 4 questions)	:	12.5x2 = 25
Total =		60

Module 1: Fundamentals

Need for DIP- Fundamental steps in DIP – Elements of visual perception -Image sensing and Acquisition – Image Sampling and Quantization – Imaging geometry, discrete image mathematical characterization.

Module 2: Image Transforms

Two-dimensional Fourier Transform- Properties – Fast Fourier Transform – Inverse FFT, Discrete cosine transform and KL transform. -Discrete Short time Fourier Transform-Wavelet Transform- Discrete wavelet Transform- and its application in Compression.

Module 3: Image Enhancement_

Spatial Domain: Basic relationship between pixels- Basic Gray level Transformations – Histogram Processing – Smoothing spatial filters- Sharpening spatial filters. **Frequency Domain**: Smoothing frequency domain filters- sharpening frequency domain filters Homomorphic filtering.

Module 4:_Image Restoration:

Overview of Degradation models –Unconstrained and constrained restorations-Inverse Filtering, Wiener Filter.

Module 5: Feature Extraction:

Detection of discontinuities – Edge linking and Boundary detection- Thresholding- -Edge based segmentation-Region based Segmentation- matching-Advanced optimal border and surface detection- Use of motion in segmentation. Image Morphology – Boundary descriptors- Regional descriptors.

Module 6: Image Reconstruction from Projections:

Need- Radon Transform – Back projection operator- Projection Theorem- Inverse Radon Transform.

Book Recommended: -

1. Rafael C.Gonzalez & Richard E.Woods – Digital Image Processing – Pearson Education-2/e – 2004.

Dr. Shyama Prasad Mukherjee University

2. Anil.K.Jain – Fundamentals of Digital Image Processing- Pearson Education-2003. **Reference Books:**

1. B.Chanda & D.Dutta Majumder – Digital Image Processing and Analysis – Prentice Hall of India – 2002

2. William K. Pratt - Digital Image Processing - John Wiley & Sons-2/e, 2004

DEPARTMENT OF INFORMATION TECHNOLOGY Dr. Shyama Prasad Mukherjee University

SEMESTER- VIII

COURSE CODE	:-	MJ-801P
COURSE TITLE	:-	LAB BASED ON DIGITAL IMAGE PROCESSING
CREDIT	: -	1

- 1. Simulation and Display of an Image, Negative of an Image(Binary & Gray Scale)
- 2. Implementation of Relationships between Pixels
- 3. Implementation of Transformations of an Image
- 4. Contrast stretching of a low contrast image, Histogram, and Histogram Equalization
- 5. Display of bit planes of an Image
- 6. Display of FFT(1-D & 2-D) of an image
- 7. Computation of Mean, Standard Deviation, Correlation coefficient of the given Image
- 8. Implementation of Image Smoothening Filters(Mean and Median filtering of an Image)
- 9. Implementation of image sharpening filters and Edge Detection using Gradient Filters
- 10. Image Compression by DCT, DPCM, HUFFMAN coding
- 11. Implementation of image restoring techniques
- 12. Implementation of Image Intensity slicing technique for image enhancement
- 13. Canny edge detection Algorithm

Dr. Shyama Prasad Mukherjee University

SEMESTER- VIII

COURSE CODE	: -	RC-801T
COURSE TITLE	: -	Research Methodology

CREDIT :- 12

B. Sc. (Research Course) Information Technology, Semester- VIII, Credit-04
Research Methodology (RC-802T)
Time: 3 Hours
Full Marks for End Semester: 75
Internal Assessment: 25 Marks (Mid Sem.-20 & Assignment Work-5Marks) No. of Lectures: 60

Instructions to external question setter for end semester examination (75 Marks): There will be three section of questions section A will be very short answer type questions consisting of 05 compulsory questions carrying 1 mark each. Again, section B will be short answer type questions wherein two questions are to be answered four questions are to be answered out of six questions carrying fifteen marks each.

UNIT I

Research process & Problem: Concept, step and function & significance of research in information technology, meaning and type of research, Research problem: identification and techniques, Literature survey, Research methods, qualitative research, aims and objective of research, formulation and testing of hypotheses.

UNIT II

Research design & Date election: Meaning purpose, principles of research design, research proposal types of data and their sources, methods of data collection, graphics and diagrammatic presentation of data, data collection tools, sampling, measurement scales, variables.

UNIT III

Statistical Analysis: Measures of central tendency, measures of dispersion, measures of relationship, combinational analysis, measures of disparity, sopher's index and composite index, measures o of inequality, parametric and non-parametric test, t-test test, Z test, Chi-square test.

UNIT IV

Data interpretation and analysis: Editing Coding Classification and Tabulation: Preparation of Charts and graphs through MS-Excel Statistical data processing and data analysis through SPSS,

UNIT-V

Report writing: Report writing and presentation of results, Title page, Declaration and Certificate

page. Acknowledgement Contents List of tables, figures & abbreviation, Chapters of the thesis footnotes, References & Bibliography, Appendices

Recommended books: -

- Adams, J. H.T. A Khan & Raeside (2014) Research Methods for Business and social Science Student SAGE, New Del Ale, & (2014) Kesh Method, Rawat Publications, New Delhi
- 2. Best, J.W. J.V. Kalin & AK (2017) Rosh in Education Parson, Noida
- Chawla D. & Neon Sunidhi (2016) Research Methodology Concepts and Cases Vikas Publishing House PVT. LTD. Noida.
- Dooley (2008): Social Research Methods, Prentice-Hall of India Private Limited, New Delhi
- Fox. (1997): Applied Regression Analysis, Linear models and Related Methods, Sage Publications, New Delhi.

SEMESTER- VIII

COURSE CODE	: -	RC-802T
COURSE TITLE	: -	Research Proposal
CREDIT	: -	12

CREDIT : -

Learning outcome: -

1. As with literature survey, research problem, variable, objective, hypothesis and research proposal.

2. Makes use of proper tools and surveying methods for measurement in context of collection and processing of data.

3. Familiarize the art of the research methodology, methods and techniques.

Course Structure

Preparation of Research Proposal Sprogs under the supervision of a distinguished Professor of University Department of information technology and presentation of synopsis before the full bench of

Departmental Research Council and Ph.D. scholars a pre-dissertation Seminar. The research proposal must include introduction, Origin of Problem, Objective, Hypothesis, Sources & Method Data collection, Research design & Methodology, area of study, Significance of study, Relevance for society, Contribution to existing knowledge, Future work and small list of References. Besides this, the paper will also be evaluated on the basis of performance under the heading of Review of Literature, Progress in field-work and Laboratory work for research purposes. Lastly, both Research Proposal (RC-2) and Research Report (RC-3) will be evaluated by the External Examiners in one

Recommended Book

Aja, Ram 250, Research Methods. Raw Publications, Jaipur and New Delhi.

Lofland, J and Lofland, L.H 1995 analysis social setting, A guide to qualitative observation and analysis, Wadsworth, Belmont, CA

Dr. Shyama Prasad Mukherjee University

SEMESTER- VIII

COURSE CODE	: -	RC-803T
COURSE TITLE	: -	Research Report
CREDIT	: -	12

Learning Outcomes:

1. Acquaint with literature survey, research problem, variable, objective, hypothesis and research proposal

2. Make use of proper tools and surveying methods for measurement in context of collection and processing of data

3. Familiarize the art of research methodology, methods and techniques.

Course Structure:

The research report/ dissertation must contain Title page, Declaration and Certificate page, Acknowledgement, List of tables, figures & abbreviations, Contents, Introduction, Research design & methodology, Results, Discussion, Chapters of dissertation, Conclusion, References and Appendices. A Dissertation must be presented for examination in a final form in print on A 4 size paper with 12- point font and line spacing of 1.5 containing approximately 125 pages with one-inch margins all around in hard-bound form. Illustrations and tables should be preferably placed exactly where they are to appear within the text. All dissertation pages, footnotes, equations and references should be labelled in consecutive numerical order. Lastly, both Research Proposal (RC-2) and Research Report (RC-3) will be evaluated by the External Examiners in one sitting.

Recommended Books:

Ahuja, R. (2014): Research Methods, Rawat Publications, New Delhi. Best, J.W., J. V. Kahn & A. K. Jha (2017): Research in Education, Pearson, Noida.

Kerlinger, F. N. (2021); Foundations of Behavioural Research, Surjeet Publications, Delhi.

Kothari, C. R. (2004): Research Methodology: Methods & Techniques, New Age International Publishers, New Delhi.

Kumar, R. (2009): Research Methodology: A Step-By-Step Guide for Beginners, Pearson, New Delhi.

Dr. Shyama Prasad Mukherjee University

SEMESTER- VIII

COURSE CODE	: -	MJ-801T
COURSE TITLE	: -	ARTIFICIAL INTELLIGENCE
CREDIT	:-	3

Time: 3 hours

Full Marks for End Semester: 60

Internal Assessment: 15 Marks (Mid Sem -10 & Assignment Work-5 Marks) No. of

Lectures: 45

Instruction to Question Setter for End Semester Examination (ESE 60 marks):

Group-A: Objective questions (Compulsory)	:	2 x 10 = 20
Group-B: short type questions (3 out of 5 questions)	:	3 x 5 = 15
Group-C: Descriptive Type Questions (2 out of 4 questions)	:	12.5x2 = 25
Total =		60

Module 1: Introduction: Objective, scope and outcome of the course, Meaning and definition of artificial intelligence, Physical Symbol System Hypothesis, production systems, Characteristics of production systems. Breadth first search and depth first search techniques. Heuristic search Techniques: Hill Climbing, Iterative deepening DFS

Module 2: Breadth first search and depth first search techniques. Heuristic search Techniques: Hill Climbing, Iterative deepening DFS

Module 3: Knowledge Representation, Problems in representing knowledge, knowledge representation using propositional and predicate logic logical consequences, syntax and semantics of an expression, semantic Tableau Nonvolatile data

Module 4: Network-based representation and reasoning, Semantic networks, Conceptual Graphs, frames. Description logic (DL), concept language, reasoning using DL. Conceptual dependencies (CD), scripts, reasoning using CD. Introduction to natural language processing. Automated planning, classical planning problem, forward planning, partial order planning, planning with proposal logic, hierarchical task planning, multiagent planning.

Module 5: Automated planning, classical planning problem, forward planning, partial order planning, planning with proposal logic, hierarchical task planning, multiagent planning.

Module 6: Reasoning in uncertain environments, Fuzzy logic, fuzzy composition relation, operations on fuzzy sets

DEPARTMENT OF INFORMATION TECHNOLOGY Dr. Shyama Prasad Mukherjee University

- 1. Analyze the principles and approaches of artificial intelligence and understand different aspects of Intelligent agent.
- 2. Apply different search techniques for solving real world problems and select the most appropriate solution by comparative evaluation.
- Analyze the various concepts of knowledge representations and demonstrate working knowledge of reasoning in the presence of incomplete and/or uncertain information.
- 4. Develop a basic understanding of some of the more advanced topics of AI

Book Recommended:

1. Artificial Intelligent : Elaine Rich, Kevin Knight, Mc-Graw Hill.

Dr. Shyama Prasad Mukherjee University

SEMESTER- VIII

COURSE CODE	: -	MJ-801P
COURSE TITLE	: -	LAB BASED ON AI
CREDIT	: -	1

- 1. Write a prolog program to calculate the sum of two numbers.
- 2. Write a prolog program to find the maximum of two numbers.
- 3. Write a prolog program to find the nth Fibonacci series.
- 4. Write a prolog program to find the factorial of a number.
- 5. Write a prolog program to implement GCD of 2 numbers.
- 6. Write a prolog program to implement palindrome.
- 7. Write a prolog program to implement reverse (list, reversed list) that reverses list.
- 8. Write a prolog program to implement append for two list.
- 9. Write a Prolog program to implement palindrome (List).

Dr. Shyama Prasad Mukherjee University

SEMESTER- VIII

COURSE CODE	: -	MJ-802T
COURSE TITLE	: -	DESIGN AND ANALYSIS OF ALGORITHMS
CREDIT	:-	3

Time: 3 hours

Full Marks for End Semester: 60

Internal Assessment: 15 Marks (Mid Sem -10 & Assignment Work-5 Marks) No. of

Lectures: 45

Instruction to Question Setter for End Semester Examination (ESE 60 marks):

Group-A: Objective questions (Compulsory)	:	2 x 10 = 20
Group-B: short type questions (3 out of 5 questions)	:	$3 \times 5 = 15$
Group-C: Descriptive Type Questions (2 out of 4 questions)	:	12.5x2 = 25
Total =		60

Module: 1 Sorting, Selection: Insertion Sort, Linear Time Sorting - Count Sort, Radix Sort, Selection Problem. Analysis of time complexity of all algorithms.

Module: 2 Graphs: Graph, representation of graphs, traversal of graphs, directed graphs, Directed Acyclic Graphs and Topological Ordering; all with analysis of time complexity.

Module: 3 Divide and Conquer: Introduction to divide and conquer technique, Merge Sort, Quick Sort with analysis of time complexity.

Module: 4 Greedy algorithms: Introduction to the Greedy algorithm design approach, application to minimum spanning trees, fractional knapsack problem, shortest path problem with analysis of time complexity.

Module: 5 Dynamic Programming: Introduction to the Dynamic Programming approach, application to weighted interval scheduling, integer knapsack problem with analysis of time complexity.

Module: 6 Hash Tables: Hash Functions, Collision resolution schemes.

SEMESTER- VIII

COURSE CODE	: -	MJ-802P
COURSE TITLE	: -	LAB BASED ON ALGORITHMS
CREDIT	: -	1

Suggested Practical List

1. Implement Insertion Sort, Selection sort, Bubble Sort (The program should report the number of comparisons).

- 2. Implement Merge Sort (The program should report the number of comparisons).
- 3. Implement Quick sort (The program should report the number of comparisons).
- 4. Implement Radix Sort.
- 5. Implement Count Sort.
- 6. Implement Searching Techniques: Linear and binary.
- 7. Implement BFS traversal on a graph.
- 8. Implement DFS traversal on a graph.
- 9. Implement 0-1 knapsack problem using DP

Dr. Shyama Prasad Mukherjee University

SEMESTER- VIII

COURSE CODE	: -	MJ-803T
COURSE TITLE	: -	CLOUD COMPUTING
CREDIT	: -	3

Time: 3 hours Full Marks for End Semester: 60 Internal Assessment: 15 Marks (Mid Sem -10 & Assignment Work-5 Marks) No. of Lectures: 45 Instruction to Question Setter for End Semester Examination (ESE 60 marks):

Group-A: Objective questions (Compulsory)	:	2 x 10 = 20
Group-B: short type questions (3 out of 5 questions)	:	$3 \times 5 = 15$
Group-C: Descriptive Type Questions (2 out of 4 questions)	:	12.5x2 = 25
Total =		60

Module 1: Overview of Computing Paradigm, Recent trends in Computing: Grid Computing, Cluster Computing, Distributed Computing, Utility Computing, Cloud Computing.

Module 2: Introduction to Cloud Computing: Introduction to Cloud Computing, History of Cloud Computing, Cloud service providers, Benefits and limitations of Cloud Computing

Module 3: Cloud Computing Architecture: Comparison with traditional computing architecture (client/server), Services provided at various levels, Service Models-Infrastructure as a Service (IaaS), Platform as a Service (PaaS), Software as a Service (SaaS), How Cloud Computing Works, Deployment Models- Public cloud, Private cloud, Hybrid cloud, Community cloud.

Module 4: Case Studies: Case study of Service model using Google App Engine,

Module 5: Service Management in Cloud Computing. Service Level Agreements (SLAs), Billing & Accounting, Comparing Scaling Hardware: Traditional vs. Cloud, Economics of scaling

Module 6: Cloud Security Infrastructure Security- Network level security, Host level security, Application-level security, Data security and Storage- Data privacy and security Issues, Jurisdictional issues raised by Data location, Authentication in cloud computing.

Course Outcomes: -After the completion of this course, students will be to:

Department of Information Technology

- Dr. Shyama Prasad Mukherjee University
 - 1. Recall the various aspects of cloud computing and distributed computing,
 - 2. Understand the specifics of virtualization and cloud computing architectures.
 - Develop and deploy cloud application using services of different cloud computing technologies provider:
 - 4. Google app Engine, Evaluate the security and operational aspects in cloud system design,
 - 5. identify and deploy appropriate design choices when solving real-world cloud computing problems.
 - 6. Provide recommendations on cloud computing solutions for a Green enterprise.

Books Recommended :-

- 1. Cloud Computing Bible, Barrie Sosinsky, Wiley-India, 2010
- 2. Cloud Computing: Principles and Paradigms, Editors: Rajkumar Buyya, James Broberg, Andrzej M. Goscinski, Wile, 2011
- 3. Cloud Computing: Principles, Systems and Applications, Editors: Nikos Antonopoulos, Lee Gillam, Springer, 2012

Dr. Shyama Prasad Mukherjee University

SEMESTER- VIII

COURSE CODE	: -	MJ-803P
COURSE TITLE	: -	LAB BASED ON CLOUD COMPUTING
CREDIT	: -	1

List of experiments:

- 1. Create virtual machines that access different programs on same platform.
- 2. Create virtual machines that access different programs on different platforms .
- 3. Working on tools used in cloud computing online- a) Storage b) Sharing of data c) manage

your calendar, to-do lists, d) a document editing tool

- 4. Exploring Google cloud
- 5. Exploring Microsoft cloud
- 6. Exploring amazon cloud

SEMESTER-I

COURSE CODE	: -	SEC-101T
COURSE TITLE	: -	Soft Skills
CREDIT	: -	2

Module- I - SELF ANALYSIS SWOT Analysis, who am I, Attributes, Importance of Self Confidence, Self Esteem.

Module-2 - CREATIVITY Out of box thinking, Lateral Thinking.

Module-3- ATTITUDE Factors influencing Attitude, Challenges and lessons from Attitude, Etiquette.

Module-4- MOTIVATION Factors of motivation, Self talk, Intrinsic & Extrinsic Motivators.

Module-5- GOAL SETTING Wish List, SMART Goals, Blue print for success, Short Term, Long Term, Life Time Goals. Time Management Value of time, Diagnosing Time Management, Weekly Planner to do list, Prioritizing work. Extempore ASSESSMENT

Module-6- INTERPERSONAL SKILLS Gratitude Understanding the relationship between Leadership Networking & Team work. Assessing Interpersonal Skills Situation description of Interpersonal Skill. Team Work: Necessity of Team Work Personally, Socially and Educationally.

Module-7 - LEADERSHIP Skills for a good Leader, Assessment of Leadership Skills,

Module-8 - STRESS MANAGEMENT Causes of Stress and its impact, how to manage & distress, Circle of control, Stress Busters. Emotional Intelligence what is Emotional Intelligence, emotional quotient why Emotional Intelligence matters, Emotion Scales. Managing Emotions.

TEXT BOOK:

SOFT SKILLS, 2015, Career Development Centre, Green Pearl Publications.

COURSE TITLE	: -	Lab Based on Soft Skills
CREDIT	: -	1

Personality development

SEMESTER-II

COURSE CODE	: -	SEC-201T
COURSE TITLE	: -	Organizational Behaviour
CREDIT	: -	2

Module-1 Introduction: Meaning and importance of the study of OB

Module-2 Behaviour and its causation: Introduction to personality, perception, learning and attitude

Module-3 Motivation: Importance of psychological process of motivation, salient motivation tools Need Theories/ Content Theories (Maslow's Hierarchy of Needs, Alderfer's ERG Theory Process Theories (Herzberg's Two Factor Theory and Vroom's Expectancy Theory)

Module-4 Leadership and Group Dynamics: Historically Important (Ohio State and Michigan leadership Theories), Traditional Theories (Trait Theory and Contingency Theory) Modern Theories (Charismatic Theories), Formal and informal groups, role concept

Module-5 Improving Interpersonal Effectiveness: Interpersonal communication, Introduction to TA

Module-6 Conflict Management and Team Building: Sources of Conflict, Types of Conflict, Negotiation (process and issues).

Module-7 Concepts of Organizational Culture and Organizational Development: Definition, Organizational Culture

Module-8 Organizational Development: Concept of OD, Phases of OD and OD Interventions, Limitations of OD Interventions Concept of Morale and Job Satisfaction.

Text Books:

- 1. Pareek, U. Understanding Organizational Behaviour (Oxford University Press: New Delhi)
- 2. Robbins, S.P.& Sanghi Organizational Behaviour (Prentice Hall India: New Delhi)

COURSE CODE	: -	SEC-201P
COURSE TITLE	: -	Lab Based on Organizational Behaviour
CREDIT	: -	1

Organizational Behavior, Leadership & Group Discussion and Organizational Development

Dr. Shyama Prasad Mukherjee University

SEMESTER-III

COURSE CODE	: -	SEC-301T
COURSE TITLE	: -	Advance Java Programming
CREDIT	: -	2

Module-1 Introduction to JSP: Introducing Java Server Pages Technology, JSP Architecture, JSP Actions. Introduction to the JSP tags, Detail introduction to JSP Declaratives, Detail Introduction to JSP Script lets and JSP Expressions with examples Writing the Date JSP, Reading the Request Information, Retrieving the data posted to a JSP file from HTML file

Module-2:Accessing database from JSP Implement JavaScript with JSP Working with JSP Sessions, JSP Cookies .

Module 3: Overview of Servlet: Servlet, Method of servlet, Life cycle of servlet, Features of Servlet, Advantages of servlet, Introduction to server-side programming, Running a servlet

Module 4: Passing parameter using Html form, Multiple values for a single parameter, Send redirect in servlet, Session Tracking.

TEXT BOOK:

Core Java an Integrated Approach (Black Book)- Dr. R. Nageswara Rao

Head First Servlets and JSP- Kathy Sierra, Bryan Basham, Bert Bates

Java The Complete Reference- Herbert Schildt

Dr. Shyama Prasad Mukherjee University

SEMESTER-III

COURSE CODE	: -	SEC-301P
COURSE TITLE	: -	Lab Based on JSP and SERVLET
CREDIT	: -	1

Lab Based on JSP and SERVLET

1. Write a program in JSP to display "Hello, World!".

2. Find the sum of two numbers using JSP.

3. Write a program in JSP to display the given text in a paragraph in different font sizes using a loop.

4. Create a dynamic web application in JSP to find the grade according to the marks entered by the user using the switch statement.

5. Build an application in JSP to calculate factorial of a number using recursion.

6. Write a program to create a JSP method that accepts a number and returns its double.

7. Use Page directive in JSP to display the current date.

8. Create a summation method in JSP that accepts an array and display the sum of its element.

9. Write a program to create a JSP page called alert message JSP that displays alert messages if username & password fields are blank and displays welcome user otherwise.

10.Develop an application to demonstrate the include directive in JSP to display the current date from another JSP page.

11. Write a program in JSP to display the properties of an object using the useBean directive.

12. Build an application in JSP that redirects to another page.

13. Write a program to create a servlet that displays the welcome message.

14. Create a simple interest calculator web page using a servlet.

SEMESTER- VIII

COURSE CODE	: -	AMJ-1T
COURSE TITLE	: -	ARTIFICIAL INTELLIGENCE
CREDIT	: -	3

Time: 3 hours

full Marks for End Semester: 60

Internal Assessment: 15 Marks (Mid Sem -10 & Assignment Work-5 Marks) No. of

Lectures: 45

Instruction to Question Setter for End Semester Examination (ESE 60 marks):

Group-A: Objective questions (Compulsory)	:	2 x 10 = 20
Group-B: short type questions (3 out of 5 questions)	:	$3 \times 5 = 15$
Group-C: Descriptive Type Questions (2 out of 4 questions)	:	12.5x2 = 25
Total =		60

Module 1: Introduction: Objective, scope and outcome of the course, Meaning and definition of artificial intelligence, Physical Symbol System Hypothesis, production systems, Characteristics of production systems. Breadth first search and depth first search techniques. Heuristic search Techniques: Hill Climbing, Iterative deepening DFS

Module 2: Breadth first search and depth first search techniques. Heuristic search Techniques: Hill Climbing, Iterative deepening DFS

Module 3: Knowledge Representation, Problems in representing knowledge, knowledge representation using propositional and predicate logic logical consequences, syntax and semantics of an expression, semantic Tableau Nonvolatile data

Module 4: Network-based representation and reasoning, Semantic networks, Conceptual Graphs, frames. Description logic (DL), concept language, reasoning using DL. Conceptual dependencies (CD), scripts, reasoning using CD. Introduction to natural language processing. Automated planning, classical planning problem, forward planning, partial order planning, planning with proposal logic, hierarchical task planning, multiagent planning.

Module 5: Automated planning, classical planning problem, forward planning, partial order planning, planning with proposal logic, hierarchical task planning, multiagent planning.

Module 6: Reasoning in uncertain environments, Fuzzy logic, fuzzy composition relation, operations on fuzzy sets

DEPARTMENT OF INFORMATION TECHNOLOGY Dr. Shyama Prasad Mukherjee University

- 5. Analyze the principles and approaches of artificial intelligence and understand different aspects of Intelligent agent.
- 6. Apply different search techniques for solving real world problems and select the most appropriate solution by comparative evaluation.
- Analyze the various concepts of knowledge representations and demonstrate working knowledge of reasoning in the presence of incomplete and/or uncertain information.
- 8. Develop a basic understanding of some of the more advanced topics of AI

Book Recommended:

2. Artificial Intelligent : Elaine Rich, Kevin Knight, Mc-Graw Hill.

Dr. Shyama Prasad Mukherjee University

SEMESTER- VIII

COURSE CODE	: -	AMJ-1P
COURSE TITLE	: -	LAB BASED ON AI

CREDIT :- 1

- 1. Write a prolog program to calculate the sum of two numbers.
- 2. Write a prolog program to find the maximum of two numbers.
- 3. Write a prolog program to find the nth Fibonacci series.
- 4. Write a prolog program to find the factorial of a number.
- 5. Write a prolog program to implement GCD of 2 numbers.
- 6. Write a prolog program to implement palindrome.
- 7. Write a prolog program to implement reverse (list, reversed list) that reverses list.
- 8. Write a prolog program to implement append for two list.
- 9. Write a Prolog program to implement palindrome (List).

Dr. Shyama Prasad Mukherjee University

SEMESTER- VIII

COURSE CODE	: -	AMJ-2T
COURSE TITLE	: -	DESIGN AND ANALYSIS OF ALGORITHMS
CREDIT	: -	3

Time: 3 hours

full Marks for End Semester: 60

Internal Assessment: 15 Marks (Mid Sem -10 & Assignment Work-5 Marks) No. of

Lectures: 45

Instruction to Question Setter for End Semester Examination (ESE 60 marks):

Group-A: Objective questions (Compulsory)	:	2 x 10 = 20
Group-B: short type questions (3 out of 5 questions)	:	3 x 5 = 15
Group-C: Descriptive Type Questions (2 out of 4 questions)	:	12.5x2 = 25
Total =		60

Module: 1 Sorting, Selection: Insertion Sort, Linear Time Sorting - Count Sort, Radix Sort, Selection Problem. Analysis of time complexity of all algorithms.

Module: 2 Graphs: Graph, representation of graphs, traversal of graphs, directed graphs, Directed Acyclic Graphs and Topological Ordering; all with analysis of time complexity.

Module: 3 Divide and Conquer: Introduction to divide and conquer technique, Merge Sort, Quick Sort with analysis of time complexity.

Module: 4 Greedy algorithms: Introduction to the Greedy algorithm design approach, application to minimum spanning trees, fractional knapsack problem, shortest path problem with analysis of time complexity.

Module: 5 Dynamic Programming: Introduction to the Dynamic Programming approach, application to weighted interval scheduling, integer knapsack problem with analysis of time complexity.

Module: 6 Hash Tables: Hash Functions, Collision resolution schemes.

SEMESTER- VIII

COURSE CODE	: -	AMJ-2P
COURSE TITLE	: -	LAB BASED ON ALGORITHMS
CREDIT	: -	1

Suggested Practical List

1. Implement Insertion Sort, Selection sort, Bubble Sort (The program should report the number of comparisons).

- 2. Implement Merge Sort (The program should report the number of comparisons).
- 3. Implement Quick sort (The program should report the number of comparisons).
- 4. Implement Radix Sort.
- 5. Implement Count Sort.
- 6. Implement Searching Techniques: Linear and binary.
- 7. Implement BFS traversal on a graph.
- 8. Implement DFS traversal on a graph.
- 9. Implement 0-1 knapsack problem using DP

Dr. Shyama Prasad Mukherjee University

SEMESTER- VIII

COURSE CODE	: -	AMJ-3T
COURSE TITLE	: -	BIG DATA ANALYTICS

CREDIT :- 3

Time: 3 hours

full Marks for End Semester: 60

Internal Assessment: 15 Marks (Mid Sem -10 & Assignment Work-5 Marks) No. of

Lectures: 45

Instruction to Question Setter for End Semester Examination (ESE 60 marks):

Group-A: Objective questions (Compulsory)	:	2 x 10 = 20
Group-B: short type questions (3 out of 5 questions)	:	$3 \times 5 = 15$
Group-C: Descriptive Type Questions (2 out of 4 questions)	:	12.5x2 = 25
Total =		60

Module 1: INTRODUCTION TO BIG DATA AND HADOOP Types of Digital Data, Introduction to Big Data, Big Data Analytics, History of Hadoop, Apache Hadoop, Analysing Data with Unix tools, Analysing Data with Hadoop, Hadoop Streaming, Hadoop Echo System, IBM Big Data Strategy, Introduction to Infosphere Big Insights and Big Sheets.

Module 2: HDFS(Hadoop Distributed File System) The Design of HDFS, HDFS Concepts, Command Line Interface, Hadoop file system interfaces, Data flow, Data Ingest with Flume and Scoop and Hadoop archives, Hadoop I/O: Compression, Serialization, Avro and File-Based Data structures.

Module 3: Map Reduce Anatomy of a Map Reduce Job Run, Failures, Job Scheduling, Shuffle and Sort, Task Execution, Map Reduce Types and Formats, Map Reduce Features.

Module 4: Hadoop Eco System Pig : Introduction to PIG, Execution Modes of Pig, Comparison of Pig with Databases, Grunt, Pig Latin, User Defined Functions, Data Processing operators. Hive : Hive Shell, Hive Services, Hive Meta store, Comparison with Traditional Databases, HiveQL, Tables, Querying Data and User Defined Functions. Hbase : HBasics, Concepts, Clients, Example, Hbase Versus RDBMS. Big SQL : Introduction

Module 5: Data Analytics with R Machine Learning : Introduction, Supervised Learning, Unsupervised Learning, Collaborative Filtering. Big Data Analytics with BigR.

SEMESTER- VIII

COURSE CODE	: -	AMJ-3P
COURSE TITLE	: -	LAB BASED ON BIG DATA
CREDIT	:-	1

List of experiments:

1 Image Printing Program Based on Halftoning.

2 Reducing the Number of Intensity Levels in an Image.

3 Zooming and Shrinking Images by Pixel Replication.

4 Zooming and Shrinking Images by Bilinear Interpolation.

5 Arithmetic Operations.

6 Image Enhancement Using Intensity Transformations.

7 Histogram Equalization.

- 8 Spatial Filtering.
- 9 Enhancement Using the Laplacian.
- 10 Unsharp Masking

SEMESTER-I

COURSE CODE	:-	SEC-1T
COURSE TITLE	: -	Soft Skills
CREDIT	:-	2

Module- I - SELF ANALYSIS SWOT Analysis, who am I, Attributes, Importance of Self Confidence, Self Esteem.

Module-2 - CREATIVITY Out of box thinking, Lateral Thinking.

Module-3- ATTITUDE Factors influencing Attitude, Challenges and lessons from Attitude, Etiquette.

Module-4- MOTIVATION Factors of motivation, Self talk, Intrinsic & Extrinsic Motivators.

Module-5- GOAL SETTING Wish List, SMART Goals, Blue print for success, Short Term, Long Term, Life Time Goals. Time Management Value of time, Diagnosing Time Management, Weekly Planner to do list, Prioritizing work. Extempore ASSESSMENT

Module-6- INTERPERSONAL SKILLS Gratitude Understanding the relationship between Leadership Networking & Team work. Assessing Interpersonal Skills Situation description of Interpersonal Skill. Team Work: Necessity of Team Work Personally, Socially and Educationally.

Module-7 - LEADERSHIP Skills for a good Leader, Assessment of Leadership Skills,

Module-8 - STRESS MANAGEMENT Causes of Stress and its impact, how to manage & distress, Circle of control, Stress Busters. Emotional Intelligence what is Emotional Intelligence, emotional quotient why Emotional Intelligence matters, Emotion Scales. Managing Emotions.

TEXT BOOK:

SOFT SKILLS, 2015, Career Development Centre, Green Pearl Publications.

COURSE CODE	: -	SEC-1P
COURSE TITLE	: -	Lab Based on Soft Skills
CREDIT	: -	1

Personality development

SEMESTER-II

COURSE CODE	: -	SEC-2T
COURSE TITLE	: -	Organizational Behaviour
CREDIT	: -	2

Module-1 Introduction: Meaning and importance of the study of OB

Module-2 Behaviour and its causation: Introduction to personality, perception, learning and attitude

Module-3 Motivation: Importance of psychological process of motivation, salient motivation tools Need Theories/ Content Theories (Maslow's Hierarchy of Needs, Alderfer's ERG Theory Process Theories (Herzberg's Two Factor Theory and Vroom's Expectancy Theory)

Module-4 Leadership and Group Dynamics: Historically Important (Ohio State and Michigan leadership Theories), Traditional Theories (Trait Theory and Contingency Theory) Modern Theories (Charismatic Theories), Formal and informal groups, role concept

Module-5 Improving Interpersonal Effectiveness: Interpersonal communication, Introduction to TA

Module-6 Conflict Management and Team Building: Sources of Conflict, Types of Conflict, Negotiation (process and issues).

Module-7 Concepts of Organizational Culture and Organizational Development: Definition, Organizational Culture

Module-8 Organizational Development: Concept of OD, Phases of OD and OD Interventions, Limitations of OD Interventions Concept of Morale and Job Satisfaction.

Text Books:

- 3. Pareek, U. Understanding Organizational Behaviour (Oxford University Press: New Delhi)
- 4. Robbins, S.P.& Sanghi Organizational Behaviour (Prentice Hall India: New Delhi)

COURSE CODE	: -	SEC-2P
COURSE TITLE	: -	Lab Based on Organizational Behaviour
CREDIT	: -	1

Organizational Behavior, Leadership & Group Discussion and Organizational Development

Dr. Shyama Prasad Mukherjee University

SEMESTER-III

COURSE CODE	: -	SEC-3T
COURSE TITLE	: -	PHP Programming
CREDIT	: -	2

Module 1: Introduction to PHP

PHP introduction, inventions and versions, important tools and software requirements (like Web Server, Database, Editors etc.) PHP with other technologies, scope of PHP Basic Syntax, PHP variables and constants Types of data in PHP, Expressions, scopes of a variable (local, global) PHP Operators : Arithmetic, Assignment, Relational, Logical operators, Bitwise, ternary and MOD operator. Module 2: Handling HTML from with PHP Capturing Form Data GET and POST form methods Dealing with multi value fields Redirecting a form after submission Module 3: PHP conditional events and Loops PHP IF Else conditional statements (Nested IF and Else) Switch case, while ,For and Do While Loop Goto, Break, Continue and exit Module 4: PHP Functions: Function, Need of Function, declaration and calling of a function PHP Function with arguments, Default Arguments in Function Function argument with call by value, call by reference Scope of Function Global and Local **Reference Books:** □ Steven Holzner, "PHP: The Complete Reference Paperback", McGraw Hill Education (India), 2007. □ Timothy Boronczyk, Martin E. Psinas, "PHP and MYSQL (Create-Modify-Reuse)", Wiley India Private Limited. 2008. □ Robin Nixon, "Learning PHP, MySQL, JavaScript, CSS & HTML5", 3rd Edition Paperback, O'reilly, 2014. □ Luke Welling, Laura Thompson, PHP and MySQL Web Development", 4th Edition, Addition Paperback, Addison-Wesley Professsional, 2008. COURSE TITLE	: -	Lab Based on PHP Programming
CREDIT	: -	1

Lab Based on PHP Programming

Instructions to Paper Setters

FM:50

PM : 20

Time : 2 Hrs.

Notes to the Candidates:

1. Attempt ALL Groups. Marks are written against each Group.

2. Attempt ALL parts from GROUP A (Total 5 Marks). This group consists of 5 Questions each of 1 Mark.

3. Attempt any **THREE** parts from **GROUP B** (**Total 45 Marks**). This group consists of **5 Questions** each of **15 Marks**.

B. A. [Major Paper]

FM:75

PM : 30

Time : 3 Hrs.

Notes to the Candidates:

1. Attempt ALL Groups. Marks are written against each Group.

 Attempt ALL parts from GROUP A (Total 15 Marks). This group consists of 3 Questions each of 5 Marks. Question 1 consists of 5 Questions each of 1 Mark. Question
 and 3 should be very short type Question each of 5 Marks.

3. Attempt any FOUR parts from GROUP B (Total 60 Marks). This group consists of 6 Questions each of 15 Marks.

B. A. [Minor Paper]

FM:75

PM : 30

Time : 3 Hrs.

Notes to the Candidates:

1. Attempt ALL Groups. Marks are written against each Group.

Attempt ALL parts from GROUP A (Total 15 Marks). This group consists of 3 Questions each of 5 Marks. Question 1 consists of 5 Questions each of 1 Mark. Question 2 and 3 should be very short type Question each of 5 Marks.

3. Attempt any FOUR parts from GROUP B (Total 60 Marks). This section consists of 6 Questions each of 15 Marks.

B. A. [Major/Minor Paper]

FM : 100

PM:40

Time : 3 Hrs.

Notes to the Candidates:

1. Attempt ALL Groups. Marks are written against each Group.

Attempt ALL parts from GROUP A (Total 20 Marks). This group consists of 3 Questions each of 5 Marks. Question 1 consists of 10 Questions each of 1 Mark. Question 2 and 3 should be very short type Question each of 5 Marks.

3. Attempt any FOUR parts from GROUP B (Total 80 Marks). This group consists of 6 Questions each of 20 Marks.

B. A. [For Semester Internal Examinations] FM : 20

Time : 1 Hr.

Notes to the Candidates:

1. Attempt ALL Groups. Marks are written against each Group.

 Attempt ALL parts from GROUP A (Total 10 Marks). This group consists of 2 Questions each of 5 Marks. Question 1 consists of 5 Questions each of 1 Mark. Question
 2 should be very short type Question each of 5 Marks.

3. Attempt any ONE part from GROUP B (Total 10 Marks). This group consists of 2 Questions each of 10 Marks.
